

Accodating Students With Diabetes

The School District Registered Nurse is appointed to:

1. Consult and coordinate with the parents and health care providers of students with diabetes; and
2. Train and supervise the appropriate staff in the care of students with diabetes.

The district shall develop and follow an individual health plan for each student with diabetes. Each individual health care plan shall include an Individual Emergency Plan (IEP) and a 504 Accommodation Plan element. The health plans shall be updated annually, and more frequently as needed.

Parents of students with diabetes may designate an adult to provide care for their student consistent with the student's individual health care/504 Plan. At parent request, school district employees may volunteer to be a parent-designated adult under this policy, but they shall not be required to participate. Parent-designated adults who are school employees shall file a voluntary, written, current and unexpired letter of intent stating their willingness to be a parent-designated adult. Parent-designated adults who are school employees are required to receive training in caring for students with diabetes from the registered school nurse or from a nationally certified diabetes educator. Parent-designated adults who are not school employees are required to show evidence of comparable training, and meet school district requirements for volunteers. Parent-designated adults shall receive additional training from a parent-selected health care professional or expert in diabetic care to provide the care requested by the parent. The registered school nurse is not responsible for the supervision of procedures authorized by the parents and carried out by the parent-designated adult.

In addition to adhering to the requirements of each individual health care plan, for the general care of students with diabetes, the district shall:

1. Acquire necessary parent requests and instructions for treatment.
2. Acquire monitoring and treatment orders from licensed health care providers prescribing within the scope of their licensed authority.
3. Assure that all staff will document diabetes care including medications, treatments, and observations that they provide students.
4. Provide sufficient and secure storage for medical equipment and medication provided by the parent.
5. Permit students with diabetes to perform blood glucose tests, administer insulin, and treat hypoglycemia and hyperglycemia, with easy access to the necessary supplies, equipment and medication necessary under their individual health care plan/504. This includes the option for students to carry the necessary supplies, equipment and medication on their person and perform

monitoring and treatment functions wherever they are on school grounds or at school sponsored events.

6. Permit students with diabetes unrestricted access to necessary food and water on schedule and as needed and unrestricted access to bathroom facilities. When food is served at school events, provision shall be made for appropriate food to be available to students with diabetes.
7. School meals will not be withheld from any student for disciplinary reasons. Students with diabetes shall not miss meals because they are not able to pay for them. The charge for the meal will be billed to the parent or adult student and collected consistent with district policies.
8. Parents and health care providers of students with diabetes will be provided with a description of their student's school schedule to facilitate the timing of monitoring, treatment and food consumption.
9. Each student's individual health care plan/504 will be distributed to appropriate staff based on the student's needs and the staff member's contact with the student.

The district, its employees, agents or parent-designated adults who act in good faith and in substantial compliance with a student's individual health care plan/504 and the instructions of the student's health care provider shall not be criminally or civilly liable for services provided under chapter 350, Laws of 2002.
