Overview

Edgenuity is a dynamic company committed to providing innovative online and blended learning options to enable schools to provide instructional options for students to meet their academic goals and prepare for career and college success. Virtual course options include core curriculum along with general and career electives all supported by a Washington-certified teacher. In the last 19 years, Edgenuity has helped over three million students experience a new model of education, ignite a passion for learning, become more self-directed learners, and realize their academic goals.

- Technology
- Interdisciplinary
- World Languages

Levels:

- Advanced Placement
- Credit Recovery
- Honors

- Standard

Students

Edgenuity's courses offer flexible options for students interested in virtual learning options. Students can work at their own pace or the pace established by the teacher. Pairing online curriculum and support with real-time data makes it possible to meet each student's unique needs and ensure success.

Students with Disabilities:

The curriculum includes a variety of features to support accessibility, including video transcripts and captions, color and contrast considerations, and adjustable timings. Instruction accommodates different learning styles and provides multi-modal learning opportunities for differentiated instruction. Lessons contain a variety of modes and activities to engage and meet learner needs.

Student-Teacher Contact Requirements

Students are able to contact teachers via email, telephone, chat, and text. Teachers also have scheduled office hours. Edgenuity provides concept coaches for core subject areas. Concept coaches are available on demand during published support hours. The Virtual Instructor is responsible for phone contact with parents and students a minimum once per month.

Courseware Platform

Edgenuity's interactive curriculum is delivered through our proprietary online, interactive student portal and learning management system (LMS). Media rich content is presented in audio, visual, and verbal lessons providing multi-modal instruction. Supports and scaffolds include a close reading environment, translation tools, read-aloud, video captions, and other tools to ensure academic success. Guided notes are also a key tool in supporting students for a number of courses. Virtual instructors, concept coaches, and live online chats as well as texting provide students with instructional support, and built-in progress reporting allows students to self-monitor learning while parents and educators may carefully track and benchmark academic progress in real-time.
