

Special Education and Related Services for Eligible Students

The purpose of the District's special education program procedures is to address program areas where state and federal regulations require specific local procedures or permit local discretionary choices.

The state regulations governing implementation of special education services pursuant to the Individuals with Disabilities Education Improvement Act (IDEA) of 2004 are addressed in Chapter 392-172A WAC. These procedures do not address the requirements established in the regulations. District personnel who are not familiar with the regulations need to contact the special education department director if there are questions regarding special education. These procedures describe how the District implements its special education program.

Free Appropriate Public Education (FAPE)

The District will apply annually for Federal Part B and state special education funding to assist in the provision of special education and any necessary related services. This funding is in addition to students' basic education funding and state special education funding.

The Superintendent, in consultation with building staff, will annually determine whether to use Early Intervening Services (EIS) funding for students who have not been identified as needing special education or related services, but who need additional academic and behavioral support to succeed in a general education environment.

The District will annually report to the Office of Superintendent of Public Instruction (OSPI) the number of students receiving EIS; and the number of students who received EIS and subsequently received special education and related services under Part B of IDEA during the preceding two-year period.

Services to eligible special education students, age three to 21, will be provided without charge to the student. This does not include incidental fees that are normally charged to all students. Special education services will include preschool, elementary, and secondary education and are provided in conformance with the student's Individualized Education Program (IEP).

The District provides a continuum of services for students, regardless of the funding source. Where the District is unable to provide all or part of the special education or necessary related services, it will make arrangements through contracts with other public or non-public sources, inter-district agreements, or interagency coordination.

Students Covered by Public or Private Insurance

The District may use Medicaid or other public insurance benefits programs in which a student participates to provide or pay for services required to provide a FAPE, as permitted by the public insurance program. However, the district will not:

- A. Require parent/guardians to sign up for or enroll in public benefits or insurance programs in order for their student to receive FAPE under Part B of the IDEA;
- B. Require parent/guardians to incur an out-of-pocket expense such as the payment of a deductible or co-pay amount incurred in filing a claim;

- C. Use a parent/guardian or student's benefits under a public insurance programs if that use would:
1. Decrease available lifetime coverage or any other insured benefit;
 2. Result in the family paying for services required after school hours that would otherwise be covered by the public insurance program;
 3. Increase premiums or result in discontinuation of insurance; or
 4. Risk loss of eligibility for home and community-based waivers, based on aggregate health-related expenditures.

The District may access a parent/guardian's private insurance proceeds to provide FAPE to an eligible student only if the parent/guardian provides informed consent to the district. Whenever the District proposes to access the parent/guardian's private insurance proceeds, the District will:

- A. Obtain parent/guardian consent in accordance with [Chapter 392-172A WAC](#) each time the District wishes to access benefits for a new procedure; and
- B. Inform the parent/guardians that their refusal to permit the district to access their insurance does not relieve the District of its responsibility to ensure that all required services are provided at no cost to the parent/guardians.

Before first accessing a parent/guardian's or student's public benefits, for the first time and annually after the first notification, the District will provide written notification using the prior written notice provisions under [WAC 392-172A-05010\(3\)](#) that includes:

- A. a statement of the parental/guardian's consent provisions;
- B. a statement of the "no cost" provisions;
- C. a statement that the parent/guardians may withdraw their consent to disclose personally identifiable information to the agency responsible for administering the state's public benefits or insurance, and
- D. a statement that a parent/guardian's withdrawal or refusal to consent does not relieve the school district of its responsibility to ensure that all required services are provided at no cost to the parent/guardians.

After providing the required notification, the District will obtain written informed consent from the parent/guardian allowing the District to disclose information from the student's educational records to the agency responsible for administering the state's public benefits or insurance programs. The consent will specify:

- A. The personally identifiable information that may be disclosed, such as records or information about the services that may be provided to the student;
- B. The purpose of the disclosure;
- C. The agency to which the disclosure will be made; and
- D. That the parent/guardian understands and agrees that the public agency may access the parent/guardian's or student's public benefits or insurance to pay for services under the act.

To avoid financial cost to parent/guardians who would otherwise consent to use private insurance, or public benefits if the parent/guardian would incur a cost such as a deductible or co-pay, the District may use its Part B funds to pay the cost the parent/guardians would incur.

The special education staff member is responsible for providing the required notices and requests for consent to parent/guardians under this section.

Parent/Guardian Participation in Meetings

The District encourages parental/guardian's involvement and sharing of information between the District and parent/guardians to support the provision of appropriate services to its students. As used in these procedures, the term "parent/guardian" includes biological and adoptive parent/guardians, legal guardians, persons acting in the place of a parent/guardian, such as relatives and stepparent/guardians, foster parent/guardians, persons appointed as surrogate parent/guardians, and adult students.

Parent/guardians (and as appropriate, students) will be provided the opportunity to participate in any meetings with respect to the identification, evaluation, educational placement, and provision of a FAPE, including IEP team meetings, school discipline, and truancy meetings.

When a meeting is scheduled parent/guardians will be:

- A. Notified of the meeting early enough that they will have an opportunity to attend.
- B. Notified of the availability of interpretation and translation services at no cost to the parent/guardians;
- C. Notified of the purpose, time, and location of the meeting and who will be in attendance;
- D. The parent/guardian will be notified that the district or the parent/guardian may invite others who have knowledge or special expertise of the student; and
- E. The meetings will be scheduled at a mutually agreeable time and place.

The District will take whatever action is necessary to ensure that the parent/guardian understands the proceedings of the IEP team meeting, including but not limited to, arranging for an interpreter for parent/guardians who are deaf or hard of hearing or whose native language is other than English. The District will maintain documentation of the language in which families prefer to communicate and whether a qualified interpreter for the student's family was provided.

The staff person responsible for inviting the parent/guardians to meetings will keep documentation of the information provided and the methods used to notify the parent/guardians of the meeting. The District may proceed with a meeting if the District is not able to convince the parent/guardian to attend. In this case, the District will document at least three different attempts to arrange the meeting through at least two different methods (i.e. phone calls, e-mails, letters sent certified mail, etc.). This documentation will be kept in the student's special education file.

If the parent/guardian cannot attend a meeting but wishes to participate, the District will arrange for other means to participate. This can include individual or conference phone calls, video, or other means of conferencing.

A meeting does not include informal or unscheduled conversations involving district personnel; conversations on issues such as teaching methodology, lesson plans, coordination of service provisions; or preparatory activities that district personnel engage in to develop a proposal or a response to a parent/guardian proposal to be discussed at a later meeting.

Identification and Referral (Child Find)**A. Identification**

The purpose of Child Find is to locate, evaluate, and identify children with suspected disabilities in need of special education services including those who are not currently receiving special education and related services and who may be eligible for those services. Activities are to reach:

1. Children residing in the school district boundaries including preschool-aged children.
2. Children attending approved, nonprofit private elementary and secondary schools located within the district boundaries.
3. Highly mobile children (such as children experiencing homelessness, in foster care, and living in migrant conditions);
4. Children who have a disability and may need special education services even though they are advancing from grade to grade; and
5. Children at home or home-schooled.

The District will consult with parent/guardians and representatives of private school students to ensure its Child Find activities are comparable in approved, nonprofit private schools located within district boundaries. These consultations will occur annually by meetings.

The District reaches students who may be eligible for special education services through:

1. Notification to parent/guardians of child find activities in its annual informational packet;
2. Notification to parents/guardians district-wide through local papers or other media;
3. Information regarding child find on the district's Web site;
4. Notification to private schools located in the district's boundaries;
5. District informational mailings;
6. Posting notices regarding screening and referral in school buildings and public locations including DSHS community service offices, Employment Security offices, grocery stores, Laundromats, day cares, community preschool sites, and physicians' offices;
7. Notifying and coordinating with the designated Part C lead agencies;
8. Early childhood screenings conducted by the District;
9. Coordination with other public and private agencies and practitioners;
10. Written information provided to district staff on referral procedures;
11. Training teachers and administrators on referral/evaluation/identification procedures; and
12. Review of student behavior, discipline, and absentee information and information gathered from district-wide assessment activities.

When district staff have concerns that a student may have a suspected disability which could result in eligibility for special education services, they will notify the school psychologist in the student's building and the psychologist will convene a staff meeting to discuss the staff's concerns which may result in a special education referral for the student.

The District's special education department contracts with Educational Service District (ESD) 123 to conduct early childhood screenings for ages birth to three. When parent/guardians or others inquire about screenings, the caller will be referred to the ESD123. The ESD123 will facilitate the screening, evaluation, and services for birth to three.

B. Referral

A student, whether enrolled in school, may be referred for a special education evaluation by parent/guardians, district staff, or other persons knowledgeable about the student. Each building principal will designate a person responsible for ensuring that district staff understands the referral process and maintain the availability of the District's optional referral form. Referrals are required to be in writing unless the person referring is unable to write and/or communicate orally. A person who makes a referral orally must be provided with the optional district referral form in the requestor's native language and offered assistance in completing the referral with the support of a qualified interpreter when needed.

When a referral is made, the District must act within a 25 school-day timeline to decide about whether the student will receive an evaluation for eligibility for special education services.

All certificated employees will document referrals immediately upon a referral being made to or by them. All other staff receiving a referral from another person will notify the special education teacher or appropriate building psychologist. The evaluating special education staff member (e.g. school psychologist, speech pathologist, occupational therapist, physical therapist, teacher of the visually impaired) : (a) records the referral; (b) provides written notice of the referral to the parent/guardian, including the date the request was received; and (c) advises the Special Education Department to collect and review district data and information provided by the parent/guardian to determine whether evaluation is warranted.

During the referral period the evaluation team will collect and review existing information from all sources, including parent/guardians. Examples may include:

1. Child's history, including developmental milestones;
2. Report cards and progress reports;
3. Individual teacher's or other provider information regarding the child including observations;
4. Assessment data;
5. Medical information, if provided; and
6. Other information that may be relevant to assist in determining whether the child should be evaluated.

If the review of data occurs at a meeting, the parent/guardian will be invited. A member of the evaluation team provides written notice to the parent/guardians of the decision regarding evaluation, whether the parent/guardians attend the meeting.

Recommendations regarding evaluation are forwarded to the special education department.

After the evaluation team reviews the request for evaluation and supporting data and does not suspect that the child has a disability, the District may deny the request. In this case written notice, including the reason for the denial and the information used as the basis for the denial, must be given to the parent/guardian.

If the determination is that the child should be evaluated, the reviewers will include information about the recommended areas of evaluation, including the need for further medical evaluation of the student. This information will assist the district in providing parent/guardians prior written notice and will assist the District in selecting appropriate evaluation group members. A member of the evaluation team is responsible for notifying parent/guardians of the results using prior written notice. When the determination is that the child will be evaluated, parent/guardian consent for evaluation and consent for release of appropriate records will be sent with the notice.

The evaluating special education staff member (e.g., school psychologist, speech pathologist, occupational therapist, physical therapist, teacher of the visually impaired) will seek parental/guardian's consent to conduct the evaluation without any unnecessary delay. The District is not required to obtain consent from the biological parent/guardian if:

1. The student is a ward of the state and does not reside with a parent/guardian;
2. The parent/guardian cannot be located, or their rights have been terminated; or
3. Consent for an evaluation is given by an individual appointed to represent the student.

When the parent/guardian provides consent, the District will select an evaluation group. The evaluation group is to complete the evaluation within 35 school days after the District's receipt of parent/guardian consent, unless:

1. The parent/guardians and district agree in writing to extend the timeline;
2. The parent/guardian fails or refuses to make the student available for the evaluation; or
3. The student enrolls in another school district after the evaluation is begun, but before completion, and the parent/guardian and new district have an agreement for completion of the evaluation.

If a parent/guardian does not provide written, informed consent for the evaluation, notify the evaluating special education staff member (i.e., school psychologist, speech pathologist, occupational therapist, physical therapist, teacher of the visually impaired) will contact the Special Education Director. District staff will decide as to whether it wishes to use mediation to seek agreement to evaluate or file a due process hearing to override the parent/guardian's refusal to consent. The District may not override a parent/guardian's refusal to consent for an evaluation if the student is homeschooled or is unilaterally placed in a private school.

If the parent/guardian does not provide written informed consent and the District does not use mediation or due process, the evaluating special education staff member (e.g. school psychologist, speech pathologist, occupational therapist, physical therapist, teacher of the visually impaired) will provide the parent/guardian with prior written notice informing the parent/guardian that the district cannot proceed with the evaluation to determine eligibility and is not responsible for providing special education and related services without an initial evaluation to determine eligibility.

Evaluation and Reevaluation

A. Evaluation of Students moving from Part C to Part B and Participation in Transition Planning Conferences

The District will participate in transition planning conferences, arranged by the local lead agency as designee of the Part C lead agency for each student who may be eligible for preschool

services. Transition plans will be designed to promote uninterrupted provision of appropriate services to the child.

1. The Early Learning Center Team will serve as the point of contact with the family resource coordinator for timely execution of transition planning conferences that are arranged at least 90 days before the student's third birthday by the designee of the Part C agency;
2. Within 25 school days following the transition planning conference, a determination whether to evaluate the student for Part B services will be made;
3. The District will follow the procedures for obtaining consent and conducting an initial evaluation, and provide prior written notice of the decision, if it determines that the student will be evaluated to determine eligibility for Part B services;

The District will follow the procedures for timelines and evaluation requirements for students moving from Part C to Part B. However, students turning three, who were previously determined eligible for early intervention services under Part C of IDEA, will be evaluated for initial eligibility for special education services under Part B of IDEA. The evaluation must be completed in enough time to develop an initial IEP by the date of the student's third birthday.

B. Evaluation Requirements

The purpose of the evaluation is to collect information about a student's functional, developmental, and academic skills and achievements from a variety of sources, to determine whether a student qualifies for special education and related services, and to develop an IEP. This includes information provided by the parent/guardian. All information gathered in this process is reviewed by the IEP team or other group of qualified professionals.

The evaluation must be an individual assessment designed to determine:

1. Whether the student is eligible for special education and any necessary related services; and,
2. The nature and extent of special education and related services needed by the student, including information related to enabling the child to be involved in and progress in the general education curriculum.

The building special education team will select the members of the evaluation group. Members selected must be knowledgeable about the student and the areas of suspected disabilities. Qualifications of a group member include having the appropriate professional license or certification and may include outside practitioners when necessary.

When assessing for specific learning disabilities, the parent/guardian and a group of qualified professionals must be part of the group. If the student requires a medical evaluation in order to determine eligibility, the District will coordinate with the parent/guardians to arrange for the evaluation at district expense or through the use of public or private insurance if the parent/guardian consents to allow the district to use the insurance.

There are many legal requirements for conducting evaluations. Evaluation procedures or materials must be free of racial, cultural, or sexual/gender bias and they must be used for the purpose for which they are valid and reliable. Tests must be appropriate for the student's age and

stage of developmental level. Tests should be administered in the native language of the student or conducted in the mode of communication most familiar to the student. If it appears to be clearly not feasible to conduct a procedure or test in the mode of communication most frequently used by the student, the IEP team will contact the special education administrator to develop an individualized strategy for valid evaluation of the student's skills. The inclusion of parent/guardians in this collaboration is desirable and strongly encouraged.

Specific areas to be included in the evaluation are determined by the building evaluation team and other qualified professionals, as appropriate, as part of a review of existing data concerning the student. The evaluation does not rely on one source or procedure as the sole criterion for determination and should include:

1. Review of existing data, including corresponding response to intervention (RTI) documentation;
2. Relevant functional and developmental information;
3. Information from parent/guardians;
4. Information from other providers;
5. Information related to enabling access to and progress within the general education curriculum and assisting in determining whether there is a disability and the content of the IEP;
6. Current classroom-based evaluations, using criterion-referenced and curriculum-based methods, anecdotal records, and observations;
7. Teacher and related service providers' observations; and
8. Testing and other evaluation materials, which may include medical or other evaluations when necessary.

All current evaluation data as well as data previously reviewed by the team must be considered. Professional members of the evaluation team need to be familiar with qualifying disability definitions and criteria in federal and state rules.

This review of existing data may be in the form of a meeting of IEP team members or may be conducted without a meeting. It includes data provided by parent/guardians, data gathered in the general education classroom, or data from state and district level assessments. The data may provide information about the student's physical condition, social or cultural background, and adaptive behavior.

When additional assessments are necessary, the group members have the responsibility of selecting, administering, interpreting, and making judgments about evaluation methods and results, and ensuring that the tests and assessments are administered by qualified personnel in accordance with the instructions of the test producer. The gathering of additional data in combination with existing data must be sufficiently comprehensive to address all areas of the suspected disability and any special education needs, whether linked to the disability category or not. If the IEP Team determines that no additional data are needed, the IEP team will notify the student's parent/guardian of that determination and the reasons for it and inform them of their right to request additional assessments. The district will complete the evaluation using existing data.

Parent/guardians and district staff are encouraged to work towards consensus, but the District has the ultimate responsibility to determine whether the student has a disability or not. The building special education staff will provide the parent/guardian with prior written notice of the eligibility decision, as well as a copy of the evaluation report. If the parent/guardian disagrees with the eligibility decision, they will be informed of their dispute resolution options described in the procedural safeguards.

C. Specific Learning Disability (SLD)

The District uses a combination of severe discrepancy and a process based on a student's response to scientific, research-based intervention in determining the identification of students with a specific learning disability consistent with the District's RTI Policy and Procedures 2163. Grade levels and content areas are described in the district's RTI general education procedure.

In addition, the evaluation group may consider a pattern of strengths and weaknesses in performance and/or achievement that is determined by a group to be relevant to the identification of SLD when considering eligibility. Patterns of strength and challenges historically refer to the examination of profiles across different tests used in the identification of children with SLD.

Student response is only one element of determining whether a child has a specific learning disability. The evaluation will be comprehensive and address all areas of suspected disability and will also include whether the child performs adequately to meet the grade-level standards in the general curriculum. The evaluation will also include whether failure to make progress is or is not the result of:

1. A physical, mental, emotional, cultural or environmental factor or limited English proficiency; or
2. Inadequate instruction in reading or mathematics.

The District must act promptly on a referral. Anyone, including parent/guardians and teachers, can make a referral at any time. A student cannot be required to progress through all levels of intervention before being evaluated if evidence exists to suspect a disability.

D. Evaluation of Transfer Students

If a student transfers into the District while an evaluation process is pending from the other district, the building IEP team is responsible for determining the status of evaluations conducted to date and deciding as to whether the evaluation can be completed within the 35-school day timeline from the date the parent/guardian provided consent. If the determination is that additional time will be needed, a member of the building evaluation team will notify the parent/guardian and obtain the parent/guardian's agreement to establish a new timeline.

E. Eligibility

The evaluation group and the parent/guardian will determine whether the student is eligible for special education services.

1. A student is not eligible if the determinant factor is lack of appropriate instruction in reading or math, based upon the state's grade level expectations or limited English proficiency; and

2. Eligibility may be determined by documented professional judgment when:
 - a. Properly validated tests are unavailable; or
 - b. Corroborating evidence indicates that results were influenced due to measuring a disability.

The parent/guardian will be provided with a copy of the evaluation report and the documentation of determination of eligibility.

Parent/guardians will also be provided with prior written notice of the eligibility decision within ten school days of the decision. The building evaluation team) is responsible for sending the notice.

Students remain eligible for special education services until one of four events occur:

1. The student is determined through a reevaluation to no longer be eligible for special education;
2. The student has met the district's high school graduation requirements;
3. The student has reached age 21. A special education student whose 21st birthday occurs after August 31, will continue to be eligible for special education and any necessary related services for the remainder of the school year; or
4. The student no longer receives special education services based upon a parent/guardian's written revocation of services.

When a special education student is expected to graduate prior to age 21, or when graduation is part of the transition plan, the IEP team will document a student's progress towards achieving course credits towards graduation on the transition portion of the IEP. The district will provide prior written notice to parent/guardians and adult students that the student is expected to graduate and will no longer be eligible for special education services. The district will also provide the parent/guardians and student with a summary of academic achievement and functional performance and recommendations to assist the student with postsecondary goals.

F. Evaluation Report

Each person conducting an assessment of the student will specify the procedures and instruments used and their results and the significance of findings related to the student's instructional program, including a specification of the factors interfering with performance and the special education and related services needed.

The evaluation group will determine who is most appropriate to develop the evaluation report reflecting the evaluation information. This will be completed before the conclusion of the evaluation period and will, at a minimum:

1. Identify the disability that requires special education and related services if a disability exists;
2. Discuss assessments and review data supporting conclusions regarding eligibility;
3. Include the additional information required for the specific learning disability eligibility category;
4. Describe how the disability or disabilities affect the student's involvement and progress in the general curriculum;

5. Make recommendations to the IEP team with respect to special education and related services needed, materials or equipment, instructional and curricular practices, student management strategies, the need for extended school year services beyond 180 school days, and location of services;
6. Include other information, as determined through the evaluation process and parent/guardian input;
7. Include the additional information required for the specific learning disability eligibility category;
8. Provide any necessary professional judgments and the facts or reasons in support of the judgments; and
9. Be signed and dated by the evaluation group members certifying their agreement. Any group member who disagrees with the conclusions of the report will prepare a separate statement representing their own conclusion.
10. The evaluating special education staff member (e.g., school psychologist, speech pathologist, occupational therapist, physical therapist, teacher of the visually impaired) is responsible for notifying parent/guardians of the date, time, and location of evaluation meetings by following the procedures in the parent/guardian participation section for inviting parent/guardians to meetings

G. Reevaluations

A reevaluation of a student receiving special education or related services is conducted if academic achievement and functional performance has improved to warrant a reevaluation if the IEP team suspects that the student may no longer be a student with a disability or if the child's parent/guardian or teacher requests a reevaluation. A reevaluation does not occur more than once per year unless parent/guardian and school agree otherwise. A reevaluation must occur at least once every three years, unless parent/guardian and school staff agree that a reevaluation is unnecessary. An agreement that an evaluation is unnecessary will be confirmed in writing to the parent/guardian. The evaluating special education staff member (e.g. school psychologist, speech pathologist, occupational therapist, physical therapist, teacher of the visually impaired) will schedule a review of this determination and notify the special education department.

Students who were previously eligible under the category "Developmentally Delayed" must be reevaluated before age ten to determine eligibility within another category.

As part of any reevaluation, the IEP team members and other professionals the District determines appropriate will review existing data that includes:

1. Evaluations and information provided by the parent/guardians;
2. Current classroom-based assessment, local or state assessments, and classroom-based observations; and
3. Observations by other teachers and related services providers data.

Based on this review the team will determine whether any additional data is necessary to determine:

1. Whether the student continues to be eligible for special education and any necessary related services;
2. The present levels of performance and educational needs; and

3. Whether any additions or modifications to the student's program are needed. This review can occur with or without a meeting or through individual review. If the IEP team members and any other persons reviewing the data determine that no further testing is necessary, the district will notify the parent/guardians of this determination, using written prior notice and will inform parent/guardians that they have the right to request assessments if they disagree with the determination that additional testing is not necessary. Parent/guardian consent is not required if the reevaluation does not require additional testing.
4. If additional testing is needed:
 - a. The building evaluation team will request written parent/guardian consent for reevaluation and provide prior written notice identifying the areas of assessment;
 - b. If the parent/guardians do not return the signed consent form, the District will send another letter explaining the need for reevaluation and parent/guardian consent and will enclose another consent form and a copy of the prior written notice. In addition, the District will document its reasonable attempts to obtain consent such as telephone calls, emails, personal contact, and other efforts to obtain consent;
 - c. If the parent/guardians do not respond to the request for consent, and the District has documented its reasonable attempts to obtain consent, the District can proceed with the reevaluation; and
 - d. If the parent/guardians refuse to consent to the reevaluation, the evaluation group will notify the Director of Special Education so that the District can determine whether it will seek mediation in order to obtain consent or request a due process hearing to ask an administrative judge to override the parent/guardians' refusal to consent.

After the reevaluation is completed, the building evaluation team will both invite parent/guardians to the eligibility meeting and will provide prior written notice after the meeting of the results of the reevaluation to parent/guardians in their primary language, indicating one or more of the following:

1. Whether the student continues to be eligible and in need of special education;
2. Present levels of performance and educational needs of the student; and
3. Whether any additions or modifications to the special education and related services are needed to enable the student to meet IEP annual goals and to participate, as appropriate, in the general curriculum.

This notice will occur within ten school days of the eligibility decision. The building evaluation team is responsible for sending the notice.

H. Reevaluation and Graduation

No reevaluation is required when special education eligibility terminates due to graduation from high school with a regular diploma or due to reaching the end of the school year during which the student turned 21. Instead, the District will provide prior written notice to the student and the parent/guardian at the student's final IEP meeting and the IEP team will provide the student with a summary of academic achievement and functional performance including recommendations on how to assist the student in meeting post-secondary goals. The case manager is responsible for

assuring that the IEP team completes the summary of academic achievement and functional performance.

Independent Educational Evaluations (IEE)

Parent/guardians of students eligible for special education, students referred for special education and determined to not be eligible, or students determined not to need an evaluation have a right to obtain an IEE at public expense, each time the District has conducted or obtained an evaluation of the student.

When parents/guardians request an IEE, the District must decide within 15 calendar days whether it agrees to provide it. Any parent/guardian request for an independent evaluation should be immediately referred to the Executive Director of Special Education. The requests for an IEE can occur at an IEP meeting.

The Executive Director of Special Education will review the request and determine whether the request is warranted. If the District agrees to provide an IEE, arrangements will be made promptly. If the District denies the request to pay for an IEE, it must file for a due process hearing within 15 calendar days of the parent/guardian's request. The District may request mediation as an option after filing the due process hearing. If the parent/guardians withdraw their request for an IEE, the due process hearing can be dismissed.

When a parent/guardian requests an IEE, the District must provide parent/guardians a list of District criteria and evaluators. If the District initiates a hearing and a decision is made that the District's evaluation is appropriate, the parent/guardian still has the right to an IEE, but not at public expense. A parent/guardian is entitled to only one IEE at public expense each time the District has conducted an evaluation with which the parent/guardian disagrees.

If the parent/guardian obtains an IEE at either public or private expense, any results of the IEE must be considered by the District if providing FAPE. The IEE may also be presented as evidence at a hearing regarding the student.

The following are the District's criteria applicable to the performance of evaluations. An IEE must be conducted based upon these criteria, unless the parent/guardian can demonstrate that unique circumstances justify deviation from them.

1. An independent evaluation must include an observation and review of the student in an educational setting (if the student is in an educational setting) and consideration of current education records;
2. The evaluator must obtain direct information concerning the performance of the student from not less than one current teacher or other service provider of the child, unless the child does not have a current teacher/service provider;
3. The evaluator must be knowledgeable and experienced in evaluating children with similar Disabilities;
4. All assessment instruments must be administered by a qualified evaluator, be age appropriate to the child, and be administered and scored in conformance with the test publisher's instructions. The evaluation instruments are to be chosen based on their relevance to the educational questions to be addressed by the evaluation. This means that

the instruments should be those which are commonly known to and used by public school professionals. All instruments used must be current editions and reported in standard scores;

The evaluator must prepare and sign a full evaluation report containing:

1. A list of all information/data reviewed;
2. A clear explanation of the testing and assessment results;
3. A complete summary of all test scores, including, for all standardized testing administered, all applicable full scale or battery scores, domain or composite scores, and sub-test scores reported in standard, scaled or T-score format;
4. A complete summary of all information obtained or reviewed from sources other than testing conducted by the evaluator;
5. Recommendations for IEP team consideration for educational programming and, if appropriate, placement that is educationally relevant and realistic within a public educational setting.

A. Location of Evaluators Conducting IEEs

An independent evaluator must be located within the same geographic area that the District uses for its own evaluations, which is Eastern Washington. This location requirement may be waived or modified in special circumstances when unique diagnostic expertise is warranted, provided the parent/guardians can demonstrate the necessity of using an evaluator outside the specified geographic area.

B. Qualifications of Evaluators Conducting IEEs

Licensed, credentialed or otherwise qualified within the state of Washington or state of residence /practice to perform an evaluation in the specific professional discipline for which an independent evaluation is sought.

C. Cost for IEEs

The cost of an IEE shall reflect reasonable and customary rates for such services in Eastern Washington. Unreasonable costs for travel will not be reimbursed as part of the funding for an IEE. Costs above customary amounts will be approved only if the parent/guardian can demonstrate that the cost reflects a reasonable and customary rate for such evaluative services or if the parent/guardians can demonstrate that there are other factors that make the extraordinary costs necessary to exercise their right to an IEE.

D. Timeline for Completing the IEE

If the IEE has not already been conducted, it must be completed within a reasonable period from the date that the District finalizes its agreement with the evaluator to fund the IEE. Generally, the IEE should be completed within sixty (60) calendar days from the date that the District finalizes the agreement with the evaluator.

E. Provision of Evaluation Report to District

The evaluator must have parental/guardian permission to communicate and share information with the District and, as part of the contracted evaluation, must agree to prepare an evaluation report and release their assessment information and results directly to the District prior to the

receipt of payment for services. Results must be sent to the District prior to or on the same day that results are provided to the parent/guardians.

F. Conflict of Interest Requirements

The evaluator must be free of any conflict of interest and the independent evaluation must not be of benefit to any public, non-public or private school, agency, or institution.

Individualized Education Programs (IEP)

A. IEP Development

The term IEP means a written statement for each student eligible for special education that is developed, reviewed, and revised in a meeting in accordance with WAC 392-172A-03095 through WAC 392-172A-03100. The IEP reflects the implementation of instructional programs and other services for students who are eligible for special education services, based on the evaluation of student needs.

An IEP must be in effect before initiation of special education services. The IEP must be developed within 30 calendar days after the student's initial determination of eligibility for special services. IEPs must be updated annually or revised more frequently if needed to adjust the program and services.

Parent/guardian consent is required before the initial provision of special education services. If a parent/guardian refuses to consent to the provision of special education services, the District may not use mediation or due process to override a parent/guardian's refusal. When a parent/guardian refuses to provide consent a building IEP team member will notify the parent/guardian that the District does not have a FAPE obligation to the student. The notification will be documented in the student's file.

The District will maintain a confidential copy of the current IEP, which is accessible to all staff members responsible for providing education, other services, or implementation of the IEP. All staff members will be informed of their responsibilities for its implementation. This includes not only teachers and other service providers, but also bus drivers, playground and lunchroom supervisors, nursing staff, and others who may be responsible for the proper implementation. The building principal or district designee is responsible for ensuring that staff members are knowledgeable about their responsibilities.

IEPs will be implemented without undue delay following IEP meetings, regardless of the payment source for special education and or related services.

Parent/guardians are members of the IEP team and will have the opportunity to participate fully. The District will make sure that the parent/guardians understand the proceedings, including arranging for an interpreter for parent/guardians who are deaf or whose native language is other than English. The district will also ensure that meeting locations are accessible. The building IEP Team is responsible for coordinating interpreters and making arrangements for the meeting location.

The District will provide parent/guardians/guardians with a copy of the District's Restraint, Isolation and Other Uses of Reasonable Force policy with each initial and annual IEP.

B. IEP Team

The IEP team includes:

1. The parent/guardian(s) of the student;
2. Not less than one general education teacher (or preschool teacher) of the student if the student is, or will be, participating in the general education environment. The general education teacher will, to the extent appropriate, participate in development of the student's IEP, including determinations of: 1) appropriate positive behavioral interventions and supports for the student; and 2) supplementary aids and services, program modifications, and support for school personnel consistent with WAC 392-172A-01185 and WAC 392-172A-03110(2)(b);
3. Not less than one special education teacher, or if appropriate, not less than one special education provider of the student;
4. A representative of the district, who is qualified to provide or supervise the provision of special education and related services, is knowledgeable about general education curriculum, and is knowledgeable about the availability of district resources;
5. An individual who can interpret the instructional implications of the evaluation results;
6. Any other individuals who have knowledge or special expertise about the student. These individuals may be invited by both the district and the parent/guardians, at the discretion of the person making the invitation;
7. The student, when appropriate, or when required;
8. Students must be invited when the purpose of the meeting includes discussion of transition needs or services;
9. If another agency is or may be responsible for payment or provision of transition services, an agency representative will be invited, with the parent/guardian's consent. If the agency representative cannot attend the meeting, district personnel will keep the representative informed of the meeting and obtain agency information that will assist in the service provision; and
10. Parent/guardians will be notified of the participation of the Part C service coordinator or other designated representatives of the Part C system as specified by the state lead educational agency for Part C at the initial IEP meeting for a child previously served under Part C of IDEA.

The parent/guardian and district must agree in writing before any of the above team members are excused from all or part of a meeting. If a team member's area of the IEP is being discussed or modified, then the parent/guardian and district must consent to their excusal; and that specific team member must provide advance written input for their part of the IEP prior to the meeting. A Team Member Excusal Form will be provided to parent/guardians at or before the IEP meeting to sign if they choose to move forward with the meeting without all team members.

Existing team members may fill more than one of these roles if they meet the criteria for the role.

Once a mutually agreed upon IEP meeting time and location have been selected, the building IEP team will send parent/guardians a written IEP invitation citing which IEP Team members have

been invited.

Sometimes parent/guardians do not attend IEP meetings. There will also be times the parent/guardians do not agree with the IEP as proposed, and despite attempts to reach agreement on IEP content, the team does not reach agreement. If a parent/guardian attends the IEP meeting and agreement is not reached on the IEP, the team will determine whether another IEP meeting should be scheduled as soon as mutually possible, or whether there is enough information to complete the IEP. When the decision is made that the IEP will be implemented the District must send prior written notice of the decisions reached to the parent/guardian, including the date the IEP will be implemented.

When the parent/guardians do not attend the IEP meeting, despite the District's efforts to ensure participation, or if the team does not reach agreement, it is the district's obligation to offer an appropriate educational program:

1. Have IEP members present sign the IEP (or document participation if any member is unwilling to sign);
2. Send a copy to the parent/guardian, and provide the parent/guardian prior written notice that the district intends to implement the IEP; and
3. Forward the documentation of actual or attempted contacts to the Special Education Director for processing when parent/guardians do not attend the meeting.

When making changes to an IEP after the annual IEP meeting has been held, the parent/guardians and the District may agree not to reconvene an IEP meeting for the purpose of making changes. The special education IEP case manager will work with the parent/guardians to complete a Prior Written Notice indicating the changes and inform all IEP team members and appropriate individuals of the proposed changes. If the IEP team agrees with the proposed changes, the IEP case manager will revise the IEP.

C. IEP Preparation and Content

IEP teams will consider the recommendations in the initial or most recent evaluation to develop the IEP. In developing each IEP, the team must consider:

1. The strengths of the student including the academic, developmental, and functional needs of the student and the concerns of the parent/guardians for enhancing the education of their child;
2. Whether positive behavioral interventions and supports, including a behavioral intervention plan, as defined by WAC 392-172A-01031, are needed to address the student's behavior;
3. The language needs of the student as those needs relate to the student's IEP, for a student with limited English proficiency;
4. Whether Braille instruction is appropriate for a student who is blind or visually impaired;
5. The communication needs of the student (and in the case of a student who is deaf or hard of hearing, consider the student's language and communication needs), opportunities for direct communications with peers and professional personnel in the student's language and communication mode; academic level; and full range of needs, including opportunity for direct instruction in the student's language and communication mode; and
6. Whether assistive technology devices or services are needed.

IEP content must include:

1. The student's present levels of academic and functional performance with a description of how the disability(ies) affect the student's involvement and progress in the general curriculum or preschool activities;
2. Measurable academic and functional annual goals for the student (including benchmarks or short-term objectives if the student is participating in alternate assessments) that will meet the student's needs resulting from the disability(ies) to enable involvement and progress in the general curriculum or in preschool activities, and will meet the student's other educational needs;
3. A statement of special education services, any necessary related services, and supplementary aids and services based on peer-reviewed research to the extent practicable to be provided to the student and program modifications or supports for personnel so that the student may advance towards annual goals, progress in the general curriculum, and be educated and participate with other special education students and non-disabled students, and participate in extracurricular and other nonacademic activities;
4. A statement of the extent, if any, that the student will not participate with non-disabled students in general classroom, extra-curricular, and non-academic activities;
5. A statement of any individual appropriate accommodations in the administration of state or district-wide assessments of student achievement that are needed to measure academic achievement and functional performance of the child on state assessments. If the team determines that the student will not participate in a particular assessment, the IEP will address why the student cannot participate in the regular assessment(s), why the particular alternative assessment is appropriate for the child, and document (a) that the parent/guardians were informed that their student's academic achievement will be measured on alternate standards, and (b) how participation in an alternate assessment may delay or otherwise affect the student from completing the requirements for a regular high school diploma;
6. The date for the beginning of services and the anticipated frequency, location, and duration of services and modifications;
7. A statement of how the student's progress towards goals will be measured, how the student's parent/guardians will be regularly informed of their child's progress towards the annual goals, and whether the progress is sufficient to enable the student to achieve the goal by the end of the year. Measurement of the student's progress will be based on the data collected as designated on the IEP. The individual responsible for implementing the goal is responsible for maintaining the data used to measure progress. Information to the parent/guardians can be provided at the same time the district issues progress reports or report cards, or other agreed times as identified in the IEP.
8. The projected beginning date for the special education and related services;
9. With an IEP that is in effect when the child turns 16, or sooner if the IEP team determines it is appropriate, a statement of needed transition services and any interagency responsibilities or needed linkages. The transition component must include appropriate measurable postsecondary goals based on age-appropriate transition and assessments related to training, education, employment, and independent living skills where appropriate; the transition services (including courses of study) needed to assist the child

- in reaching those goals; and a description of how the postsecondary goals and transition services align with the high school and beyond plan (HSBP);
10. Emergency response protocols, if determined necessary by the IEP team for the student to receive FAPE and parent/guardians provide consent. Emergency response protocols must meet the requirements stated in WAC 392-172A-02105;
 11. A behavioral intervention plan (BIP), if determined necessary by the IEP team for a student to receive FAPE. The BIP must meet the requirements stated in WAC 392-172A-01031;
 12. The procedures by which parent/guardians/guardians will be notified of the use of isolation or restraint or a restraint device on their student.
 13. A statement regarding transfer of rights at the age of majority. The IEP case manager will provide prior written notice to the student one year prior to student turning 18 years of age; and
 14. Extended school year (ESY) services. The consideration for ESY services is a team decision, based on information provided in the evaluation report and based on the individual needs of a student. ESY services are not limited by categories of disability, or limited by type, amount, or duration of the services. If the need for ESY services is not addressed in the IEP and ESY services may be appropriate for the student, the IEP team will meet by April 15th to address the need for ESY. IEP teams may consider requests after April 15th when necessary for the student to receive a FAPE. Factors for the team to consider when determining the need for ESY may include but are not limited to: 1) Evidence of regression or recoupment time based on documented evidence; or 2) A documented determination based on the professional judgment of the IEP team including consideration of the nature and severity of the student's disability, the rate of progress, and emerging skills.

Use of Isolation, Restraint, and Restraint Devices:

A. Definitions

1. **Imminent:** The state or condition of being likely to occur at any moment or near at hand, rather than distant or remote.
2. **Isolation:** Restricting a student alone within a room or any other form of enclosure, from which the student may not leave. It does not include a student's voluntary use of a quiet space for self-calming, or temporary removal of a student from his or her regular instructional area to an unlocked area for purposes of carrying out an appropriate positive behavior intervention plan.
3. **Likelihood of serious harm:** A substantial risk that physical harm will be inflicted by a student:
 - a. upon his or her own person, as evidenced by threats or attempts to commit suicide or inflict physical harm on oneself;
 - b. upon another, as evidenced by behavior that has caused such harm or that places another person or persons in reasonable fear of sustaining such harm;
 - c. upon the property of others, as evidenced by behavior that has caused substantial loss or damage to the property of others; or

- d. after the student has threatened the physical safety of another and has a history of one or more violent acts.
4. **Positive behavioral intervention:** Strategies and instruction that can be implemented in a strategic manner to provide alternatives to challenging behaviors, reinforce desired behaviors, and reduce or eliminate the frequency and severity of challenging behaviors. Positive behavioral interventions include the consideration of environmental factors that may trigger challenging behaviors and teaching a student the skills to manage his or her own behavior.
5. **Restraint:** Physical intervention or force used to control a student, including the use of a restraint device. It does not include appropriate use of a prescribed medical, orthopedic, or therapeutic device when used as intended, such as to achieve proper body position, balance, or alignment, or to permit a student to safely participate in activities.
6. **Restraint device:** A device used to assist in controlling a student, including, but not limited to, metal handcuffs, plastic ties, ankle restraints, leather cuffs, other hospital-type restraints, pepper spray, tasers, or batons. Restraint device does not mean a seat harness used to safely transport students. This definition is consistent with RCW 28A.600.485(1)(c) and is not intended to endorse or encourage the use of such devices or techniques with district students.

B. Practices presumed to be unreasonable when correcting or restraining any student under the age of 18:

Under RCW 9A.16.100, the following is a non-exclusive list of acts that are presumed unreasonable when correcting or restraining a child:

1. throwing, kicking, burning, or cutting a child;
2. striking a child with a closed fist;
3. shaking a child under the age of three;
4. interfering with a child's breathing;
5. threatening a child with a deadly weapon; or
6. doing any other act that is likely to cause bodily harm to a student greater than transient pain or minor temporary marks.

This non-exclusive list should not be read to imply that another, unlisted form of correction or restraint is permissible. Whether or not an unlisted use of force or restraint is presumptively permissible depends upon a balanced consideration of all relevant state laws and regulations, and whether the use is reasonable under the totality of the circumstances.

C. Conditions specific to use of isolation:

1. The isolation must be discontinued as soon as the likelihood of serious harm has dissipated;
2. The enclosure will be ventilated, lighted, and temperature controlled from inside or outside for purposes of human occupancy.

3. The isolation enclosure will permit continuous visual monitoring of the student from outside the enclosure.
4. An adult responsible for supervising the student will always remain in visual or auditory range of the student.
5. Either the student shall be capable of releasing himself or herself from the enclosure, or the student shall continuously remain within view of an adult responsible for supervising the student.
6. Any staff member or other adults using isolation must be trained and currently certified by a qualified provider in the use of trauma-informed crisis intervention (including de-escalation techniques), and trained by the District in isolation requirements, unless trained personnel are not immediately available due to the unforeseeable nature of the emergency.

D. Conditions specific to use of restraint and restraint devices:

1. The use of restraint or a restraint device must be discontinued as soon as the likelihood of serious harm has dissipated;
2. The restraint or restraint device will not interfere with the student's breathing;
3. Any staff member or other adults using restraint or restraint devices must be trained and currently certified by a qualified provider in the use of trauma-informed crisis intervention (including de-escalation techniques), and such restraint or restraint devices, or otherwise available in the case of an emergency unless trained personnel are not immediately available due to the unforeseeable nature of the emergency.
4. In the case of a restraint device, either the student will be capable of releasing himself or herself from the restraint device or the student shall continuously remain within view of an adult responsible for supervising the student.

E. Prohibited practices involving restraint, use of force, and discipline:

The following practices are prohibited with students eligible for special education services:

1. District personnel are prohibited from using aversive interventions;
2. District personnel are prohibited from physically restraining or isolating a student, except when the student's behavior poses an imminent likelihood of serious harm as defined above;
3. No student may be stimulated by contact with electric current, including, but not limited to, tasers;
4. A student may not be denied or subjected to an unreasonable delay in the provision of food or liquid as a form of punishment;
5. A student may not be the recipient of force or restraint that is either unreasonable under the circumstances or deemed to be an unreasonable form of corporal punishment as a matter of state law (see above, for example, for a list of practices presumed to be unreasonable when used in correcting or restraining a child);
6. A student must not be denied or subjected to an unreasonable delay in the provision of common hygiene care;
7. A student must not be denied or subjected to an unreasonable delay in the provision of medication;

8. A student may not be excluded from his or her regular instructional or service area and isolated within a room or any other form of enclosure, except under the conditions set forth in WAC 392-172A-02110;
9. A student must not be forced to listen to noise or sound that the student finds painful;
10. A student must not be forced to smell or be sprayed in the face with a noxious or potentially harmful substance;
11. A student must not be forced to taste or ingest a substance which is not commonly consumed, or which is not commonly consumed in its existing form or concentration;
12. A student's head must not be partially or wholly submerged in water or any other liquid;
13. A student must not be physically restrained or immobilized by binding or otherwise attaching the student's limbs together or by binding or otherwise attaching any part of the student's body to an object, except under the conditions set forth in WAC 392-172A.02110; and
14. A student must not be subjected to the use of prone (lying face-down) and supine (lying face-up) restraint, wall restraint, or any restraint that interferes with the student's breathing.

F. Documentation and Reporting Requirements

Districts must follow the documentation and reporting requirements for any use of isolation, restraint, or a restraint device consistent with RCW 28A.600.485 and the parental/guardian notification requirement of RCW 28A.155.210. The staff involved or witnessing the incident will fill out an Isolation and/or Restraint Report Form recapping the incident. A copy of this report is given to parent/guardians, the building principal, and the Special Education records office.

Transfer Students

Students who transfer from one district to another within the state continue to be eligible for special education and any necessary related services. When an eligible student transfers into the District, the building registrar will notify the special education department. The appropriate special education and building staff in consultation with parent/guardians will review the student's IEP to ensure the District provides services comparable to those in the previous IEP until the District adopts the previous IEP or develops, adopts and implements a new IEP.

When a student who was identified as eligible for special education transfers from out of state into the District, the building principal or designee will notify the special education department as soon as possible. The school psychologist will review the evaluation, eligibility documentation, and IEP to determine whether the student meets state eligibility criteria. If the student meets the state eligibility criteria, the District will follow the procedures described in the previous paragraph to provide comparable services until the district develops an IEP for the student. If the student needs to be evaluated to determine eligibility in this state, the appropriate special education and building staff will notify the parent/guardians, obtain consent, and evaluate the student for eligibility within 35 school days of the receipt of the parent/guardian's consent. The District, in consultation with the parent/guardians, will continue to provide special education

services comparable to the services on the student's IEP, pending the results of the initial evaluation.

The District must take reasonable steps to obtain records promptly, including IEP supporting documents and any other records related to special education or related services from the previous school. The building special education team will contact the previous school to obtain records and will reach out to the district special education office for assistance if necessary.

Placement

No student may receive special education and related services without being determined eligible for services, and thus the evaluation process and IEP development precedes the determination of the special education placement. When a student has been evaluated and the evaluation team and parent/guardian have determined student eligibility and the need for special education and related services, programming decisions must occur. These decisions are made based on information generated through the evaluation and IEP processes. The actual program is considered within the context of least restrictive environment (LRE) and the continuum of placement alternatives (reviewed below). When determining initial eligibility for special education, including determination of the appropriate placement, the parent/guardian or adult student must provide written consent for services before the student receives special education services.

If the parent/guardians do not consent to the provision of special education and related services, the District will not provide special education services to the student. The District will notify the parent/guardians that the student is eligible for services and that the District is willing to provide the services when the parent/guardian provides written consent. The notification will also inform parent/guardians that the district has no FAPE obligation to the student when parent/guardians refuse to provide consent.

When program decisions are addressed by the IEP team, proper consideration must be given to the LRE. Within the educational setting, the student should be placed, whenever possible:

1. In the school the disabled student would normally attend; and
2. With non-disabled students in the general educational setting to the maximum extent possible.

Special classes, separate schools, or removal of students with disabilities from the general education environment occurs only when the nature or severity of the disability is such that education in the general education classroom with use of supplementary aids and services cannot be satisfactorily achieved.

If the IEP team believes that the student will not be successful within the general education classroom, the team will consider:

1. The educational benefits of full-time placement in a regular classroom;
2. The non-academic benefits of such a placement;
3. The effect the student will have on the teacher and other students in the regular classroom; and
4. The costs of placing the student in the regular classroom.

The degree to which the student is to be integrated into the general classroom setting is dependent upon the identified needs of the student. This placement is to occur unless the nature of the needs is so severe that this cannot be satisfactorily achieved, even with supplementary aids and services. If the placement is in another building, the appropriate educational placement will be as close to the student's home as reasonably possible.

Within the non-academic setting, students will be provided nonacademic and extracurricular activities with non-disabled students.

- Counseling services
- Athletics
- Transportation
- Health services
- Recreational activities
- Interest groups or clubs

Limits on nonparticipation or conditions of participation must be designated in the IEP.

To the maximum extent possible, as determined by a student's IEP team, the District will also make opportunities available for students eligible for special education to participate with non-disabled students in the District's art, music, industrial arts, computer, consumer classes, physical education (PE), library time, assemblies, and home economics classes. Within the District, a continuum of alternative placement options exists spanning within a class, resource room, self-contained, home-bound, and out-of-district provisions.

- Consulting with general education teachers for students in a general education setting.
- In-classroom support in general education classrooms
- Resource room
- Self-contained
- Homebound
- Placement in other districts for specialized instruction such as deaf education
- Residential placement
- Deaf education support services
- Visually impaired support services
- Orientation and Mobility services
- Speech language therapy both within class and separate location
- Occupational therapy
- Adaptive P.E
- Physical Therapy
- Work Experience
- Community Based Instruction opportunities
- Assistive Technology support services
- Vocational training through private contractors and other districts
- Psychological assessment services
- Counseling
- Preschool services
 - Inclusion

- Self-Contained
- Contract with private providers
- Any combination of resources above

These options are intended to address the individual needs of students.

The placement of each student with a disability will be determined annually, or sooner if appropriate, by the IEP team.

The appropriateness of placement options will be based upon various decisions including:

1. Data-based judgments in IEP development;
2. Judgments (data-based) in determining LRE;
3. The reasonable probability of the placement option(s) assisting the student to attain annual goals and objectives and the quality of services needed; and
4. The consideration of potentially harmful effects upon the student or on the quality of services needed.

Placement options along the continuum must include alternative placement options identified in the definition of special education and make provisions for supplementary services such as resource room or itinerant instruction to be provided in concert with the general education placement.

Students Unilaterally Enrolled in Private Nonprofit Schools by Parent/Guardians

On December 1st, the District will conduct an annual count of the number of private elementary and secondary school students eligible for special education who are unilaterally enrolled by their parent/guardians in a private school located within district boundaries. The District's designee will have timely and meaningful consultation with appropriate representatives of private schools and representatives of parent/guardians of private school students and make determinations about who will receive services and what services will be provided. The purpose of the child count is to determine the proportionate amount that the District must spend on providing special education and related services, including transportation, to private elementary or secondary school students in the next fiscal year.

The District is required to spend a proportionate amount of federal special education Part B and Section 619 funds to provide special education and related services to private school students. To determine which students will receive services, what services will be provided, how and where the services will be provided, and how services provided will be evaluated, the District will consult with appropriate representatives and parent/guardians of private school students. The District will make the final decision with respect to services to be provided to eligible private school students.

The special education office will notify each approved nonprofit private school or preschool operating in the District seeking recommendations of persons to serve as representatives of special education private school students in consultations with the District. An initial meeting will be called by the District to establish a work plan and schedule with the private school representatives and representatives of private school parent/guardians to discuss how to identify

students, the amount of proportionate share, how the proportionate share was calculated, which students will receive services, what services will be provided, how and where services will be provided, and how services will be evaluated.

A designee from the District's Special Education Administration Team will be responsible for private school involvement and service plan development. A private school student has no individual entitlement to any service or amount of service (s)he would have received if enrolled in a public school to receive FAPE. However, for each private school student receiving special education or related services, the District will initiate and conduct meetings to develop, review, and revise a services plan describing the special education and related services that the District will provide. The services plan must: (1) meet IEP content requirements as appropriate; and (2) be developed, reviewed, implemented, and revised annually consistent with the requirements for IEP review. The District will make every effort to include a representative from the private school at each meeting. If the private school representative is not able to attend, the District will use other methods, including individual or conference telephone calls, to assure the representative's participation.

Private school students may receive a different amount of services than students in public schools who receive special education. However, the special education services provided to eligible private school students will be provided by personnel meeting the same standards as personnel providing the services in the District.

Services to students in private schools including private sectarian schools may be provided on-site. District personnel may be made available to private schools only to the extent necessary to provide the services required if those services are not normally provided by the private school. Services will not include payment of private school teachers' or other employees' salaries, except for services performed outside regular private school hours and under public supervision and control.

Equipment and/or supplies may be placed on private school premises for the period of time necessary for the services plan program, but the District will retain and exercise title and administrative control of said equipment/supplies. The District will keep records and make an accounting assuring that said equipment/supplies is/are used solely for the services plan program. Said equipment/supplies will be removed if necessary, to avoid its/their use for other purposes or if no longer needed for the services plan program. No district funds will be used for repairs, minor remodeling, or construction of private school facilities.

The District will provide services to students in private schools in a manner that: (1) maintains physical and administrative separation between the private and public-school programs; and (2) does not benefit the private school at public expense.

Procedural Safeguards

A. Notice of Procedural Safeguards

In addition to protections provided to parent/guardians of eligible students, parent/guardians also have procedural safeguard protections when a student's identification, evaluation, or placement

is at issue. A member of the student's IEP team will provide a copy of the procedural safeguards notice to the parent/guardians and adult students one time a year and:

- a. Upon initial referral or parent/guardian request for evaluation;
- b. Upon receipt of the parent/guardian's first state complaint and first request for due process hearing in a school year;
- c. Upon a disciplinary action that will result in a disciplinary change of placement;
and
- d. Upon request by the parent/guardian.

The procedural safeguard notice used by the District includes a full explanation of all the procedural safeguards relating to independent educational evaluation, prior written notice, parent/guardian consent, access to educational records, discipline procedures for students who are subject to placement in an interim alternative educational setting, requirements for unilateral placement by parent/guardians of children in private schools at public expense, state complaint procedures, mediation, the child's placement during pendency of due process proceedings including requirements for disclosure of evidence, due process hearings, civil actions and attorney's fees. Copies of the District's special education procedural safeguards are available at the Special Education office, with the student's case manager, and can be found on the District's website

B. Consent

The District will obtain informed, written parental/guardian's consent before:

1. Conducting an initial evaluation;
2. Providing initial special education and related services to a student; and
3. Conducting a reevaluation if the reevaluation includes administration of additional assessments.

Parental/guardian's consent is not required to review existing data as part of an evaluation or reevaluation, or to administer a test or other evaluation that is administered to all students unless consent is required of all students' parent/guardians.

Informed consent means that the parent/guardian or adult student:

1. Has been fully informed of all information that is relevant to the activity for which the District is asking consent, and that the information is provided in his or her native language or other mode of communication;
2. Understands and agrees in writing to the activity for which consent is sought and the consent describes the activity and lists any records which will be released and to whom;
and
3. Understands that the granting of consent is voluntary and may be revoked at any time. If consent is revoked, the revocation does not negate an action that has occurred after the consent was given and before the consent was revoked.

The District may not use a parent/guardian's refusal to consent to one service or activity to deny the parent/guardian or child any other service, benefit, or activity of the District.

If the District is unable to obtain a parent/guardian's consent, the District may use mediation

procedures to obtain a parent/guardian's consent or request a due process hearing asking the administrative law judge to override the parent/guardian's refusal to consent to an evaluation or reevaluation. The District may not request a due process hearing to override a parent/guardian's refusal to consent to initial special education services. The District may not use mediation or due process procedures to override a parent/guardian's refusal to consent to an evaluation or reevaluation if the student is homeschooled or enrolled in a private school.

C. Revocation of Consent

Parent/guardians may revoke consent for the continued receipt of special education and related services. Whenever possible, such revocation should be in writing. If parent/guardians revoke consent, the staff member receiving the revocation will forward the revocation to the school psychologist.

Upon receipt of the parent/guardian's written notice of revocation, the school psychologist will provide prior written notice within a reasonable time before the District stops providing services. The notice will include information about the effect of revocation and will inform the parent/guardian of the date the District will stop providing special education and related services.

Discontinuation of special education and related services in response to the parent/guardian's written revocation will not be in violation of FAPE and eliminates the District's requirement to convene an IEP meeting or develop an IEP. However, the District does have a continuing Child Find duty, and staff will follow referral procedures if they believe the student should be referred for special education. In addition, parent/guardians may request that the District conduct an initial evaluation for eligibility for special education services after they have revoked consent for continued services.

D. Prior Written Notice

Prior written notices are provided to parent/guardians when the District makes a decision relating to a student's identification, evaluation, placement, or provision of a FAPE. Prior written notices document the decisions made by the IEP teams and evaluation group.

The District will provide prior written notice to the parent/guardian whenever the District proposes or refuses to initiate or change the identification, evaluation, educational placement, or provision of a FAPE to the student.

The prior written notice will include:

1. A statement that the parent/guardians have procedural safeguard protections and if a copy of the procedural safeguards do not accompany the notice, a statement that describes how a copy of the statement of procedural safeguards may be obtained;
2. A description of the action proposed or refused by the District;
3. An explanation of why the District proposes or refuses to take the action and a description of other options that the district considered and the reasons why the options were rejected;
4. A description of any other factors which are relevant to the District's proposal or refusal;

5. A description of each evaluation procedure, test, record, or report the District used as a basis for the proposal or refusal; and
6. A description of any evaluation procedures the District proposes to conduct and sources for parent/guardians to contact for assistance in understanding the procedural safeguards provision of this chapter.

Prior written notice and the notice of procedural safeguards must be provided in the native language of the parent/guardian or other mode of communication used by the parent/guardian unless it is clearly not feasible to do so. If the native language or other mode of communication of the parent/guardian is not a written language, the District will take steps to ensure that the notice is translated orally or by other means to the parent/guardian. This may involve:

1. Arranging for an interpreter if English is not the native language of the parent/guardian or if the parent/guardian has a hearing impairment; or
2. Providing notice orally if the written language is not a native language.

The District will document in writing how this information was provided and that the parent/guardian understands the content of the notice. A member of the student's IEP team (e.g. school psychologist, case manager, speech pathologist) is responsible for sending prior written notices after evaluation, eligibility, IEP team and placement decisions.

E. Transfer of Educational Rights to an Adult Student

When a student eligible for special education reaches the age of 18, all educational rights under Part B of the IDEA, previously exercised by the parent/guardian, transfer to the student, unless the student is determined incapacitated in a guardianship proceeding or the District has appointed an educational representative for the student. When the student turns 18, the District will notify the parent/guardian and student that the educational rights have transferred to the student and will send any required notices to both the parent/guardian and the adult student. A member of the student's IEP team (e.g. school psychologist, case manager, speech pathologist) is responsible for providing the notice.

At an IEP meeting occurring one year before the student turns 18, the District will inform the parent/guardians and the student that educational rights will transfer to the student and the District will inform the student about those educational rights. This information will be documented on the IEP.

Appointment of an Educational Representative

A student over the age of eighteen is presumed to be capable of making educational decisions and able to provide informed consent unless he or she is determined to be "incapacitated" through a legal guardianship proceeding. If a parent/guardian, another interested party, or the District believes that a student over the age of eighteen is unable to provide informed consent or to make educational decisions, and the student does not have a legal guardian, the parent/guardian or other interested party may ask the District to appoint an educational representative. This determination will only be made if two separate professionals, as defined by WAC 392-172A-05135(5)(a), state that they conducted an examination and interviewed the student, and concluded the student is incapable of providing informed consent. The District will inform the student of the decision and appoint either the spouse, the student's parent/guardians,

another adult, or a surrogate educational representative to represent the student. The appointment of the educational representative will continue for one year.

The student or other adult may challenge the certification at any time. If a challenge occurs, the district will not rely on the education representative, until the representative is recertified.

Confidentiality and Records Management

The District's General Counsel is responsible for maintaining the confidentiality of personally identifiable information pertaining to special education and all other students. The District's General Counsel will maintain, for public inspection, a current list of positions in the District who have access to personally identifiable information of special education students. The District will provide parent/guardian and adult students, upon request, a list of the types and locations of educational records collected, maintained, or used by the District.

The District will provide instruction annually to employees collecting or using personally identifiable information on the procedures to protect the confidentiality of personally identifiable information. The training will address the protections outlined in WAC 392-172A, state law and federal regulations implementing the Family Educational Rights and Privacy Act, FERPA, (34 CFR Part 99).

Upon request, the parent/guardian(s) of a special education student or adult student will be afforded an opportunity to inspect, review, and challenge all educational records, which will include, but not be limited to, the identification, evaluation, delivery of educational services and provision of FAPE to the student. The District will comply with the request promptly and before any meeting regarding an IEP or hearing relating to the identification, evaluation, educational placement of the student, or provision of FAPE to the student, including disciplinary proceedings. In any case, the District will respond no more than 45-calendar days after the date the District received the request. If an educational record includes information on more than one student, the parent/guardians (and/or adult student) may inspect and review only information relating to their child. School personnel receiving requests for educational records will immediately forward the request to the District's General Counsel.

If parent/guardians believe that information in an education record is inaccurate or misleading or violates the privacy or rights of the student, they may request that the district amend the information. Policy and Procedure 3600, Student Records, describes the process and timelines for challenges and hearings regarding student records

The District follows the guidelines for records retention outlined in the Secretary of State's, General Records Retention Schedule, and Records Management Manual. The District will inform parent/guardians or adult students when personally identifiable information collected, maintained, or used is no longer needed to provide educational services to the student. The information will be destroyed at the request of the parent/guardian(s) or adult student or will be provided to the parent/guardian or adult student upon their request. However, a permanent record of the student's name, address and phone number, his or her grades, attendance, record, classes attended, grade level completed, and year completed will be maintained without time limitation.

Records management is also governed by Policy and Procedure 4040, Public Records Requests.

A. Surrogate Parent/Guardian

A surrogate parent/guardian is a person appointed by the District to act on behalf of a student to help ensure the rights of the student to a FAPE when a parent/guardian cannot be identified, the whereabouts of the parent/guardian are unknown or the student is a ward of the state and does not have a foster parent/guardian.

The District's Executive Director of Special Education is responsible for determining the need for appointment of a surrogate parent/guardian.

Natural or adoptive parent/guardians, foster parent/guardians, persons acting in the place of a parent/guardian such as stepparent/guardians or relatives, and persons with legal custody or guardianship are considered parent/guardians. Students who are homeless and not living with a parent/guardian may need a surrogate parent/guardian.

The following is guidance for the District to follow to assist in determining the status of the parent/guardian's rights to make educational decisions:

1. In cases where the student is in and out of home care the District must determine the legal custodial status of the child.
2. Parent/guardians who have voluntarily placed their child in state placement still retain legal custody of the child and retain the right to make educational decisions. In this situation the student is not a ward of the state;
3. Parent/guardians whose children are placed in group care, pending a determination of "dependency" may still retain rights to make educational decisions unless otherwise ordered by the court;
4. When a disposition order and order of dependency is issued, the state becomes the legal as well as physical custodian of the child. Parent/guardians may no longer have the right to make educational decisions during this stage of dependency; and
5. Parent/guardians whose parent/guardian's rights are terminated no longer have the right to make educational decisions on behalf of their child.

When a student is placed in foster care the foster parent/guardian may act as the parent/guardian. When a student is placed in group care, the District will work with the parent/guardians, case-worker(s), foster parent/guardians, and others who have knowledge of the student's legal status in order to determine the need for appointment of a surrogate.

When selecting a surrogate parent/guardian, the District will select a person willing to participate in making decisions regarding the student's educational program, including participation in the identification, evaluation, placement of, and provisions of FAPE to the student.

If a student is referred for special education or a student eligible for special education who may require a surrogate parent/guardian transfers into the district, the District special education office will be notified of the potential need. The special education office will then select a trained individual who can adequately represent the student to ensure that all student rights are observed. The person selected as a surrogate:

1. Must have no interest that conflicts with the interests of the student he or she represents;
2. Must have knowledge and skills that assure adequate representation of the student; and
3. May not be an employee of a school district and/or other agency which is involved in the education or care of the student. This includes OSPI, DSHS, district employees, and group care providers.

The District will at a minimum, review with the surrogate parent/guardian procedural safeguards, parent/guardian involvement in the special education process, parent/guardian education publications, and special education regulations. The District will also cooperate with other districts, the ESD, or OSPI in training surrogate parent/guardians and in establishing a list of persons willing and able to serve as surrogate parent/guardians.

B. Mediation

The purpose of mediation is to offer both the parent/guardian and the District an alternative to a formal due process hearing. Mediation is voluntary and requires the consent and agreement of both parties. Mediation cannot be used to deny or delay access by a parent/guardian to a due process hearing. Mediation is used to resolve disagreements concerning the identification, evaluation, and delivery of educational services, or provision of a FAPE to a special education student. Mediation may be terminated by either party at any time during the process.

The primary participants are the parent/guardians, school district representatives, and mediator. The process is voluntary, confidential, and informal. It is a collaborative process, conducted in a non-adversarial manner. Mediation services will be provided by the Office of Superintendent of Public Instruction (OSPI) at no cost to either party.

The District's Executive Special Education Director is responsible for coordinating requests for mediation. If a parent/guardian requests mediation, notify the director and the director will respond to the parent/guardian and coordinate with OSPI's contracted agent. Staff members are reminded that discussions that occur during the mediation process are confidential.

One person designated by the District to attend the mediation must have authority to bind the District in any agreement reached through mediation.

The District requests parent/guardians meet with Sound Options and/or the Executive Director of Special Education to discuss the benefits of mediation.

Due Process Hearing

Both parent/guardians and the District may file due process hearings involving the identification, evaluation, placement, or provision of FAPE to a student. IDEA requires that specific information be provided as part of a due process hearing request. The requirements are identified in the notice of procedural safeguards. If parent/guardians request information about how to file a due process hearing, the District will provide the parent/guardian with a due process hearing request that contains the required information. Due process hearing request forms are available in each district building and on the OSPI Special Education website.

If any staff receives a request for a due process hearing, a copy of the request should be

immediately forwarded to the District's Executive Director of Special Education. If the parent/guardian has not filed the request for hearing with the Washington State Office of Administrative Hearings (OAH), the District will forward the parent/guardian's request to OAH. The District may not delay or deny a parent/guardian's due process hearing request. Parent/guardians are entitled to a copy of the notice of procedural safeguards if this is the first due process hearing in a school year. The District's Executive Director of Special Education is responsible for providing the parent/guardians a copy of the procedural safeguards in this situation, and documenting that the safeguards were provided to the parent/guardian.

When a parent/guardian files a due process hearing, the student remains in the placement at the time of the request for hearing, unless the parent/guardians and district agree to a different placement. The student's status during the pendency of any proceedings does not preclude the IEP team from meeting, as needed or as required, and updating and implementing the student's IEP, unless those changes are in dispute. See the discipline section below for placements when a disciplinary action is challenged.

When parent/guardians file a request for a due process hearing, the District's Executive Director of Special Education will immediately schedule a resolution meeting. The meeting must occur within 15 days after a parent/guardian files a due process request with the District and provides a copy of the request to OAH, or, within seven days if the hearing request involves an expedited hearing regarding discipline. The District's Executive Director of Special Education will determine the appropriate district staff that will attend the resolution meeting. The District will ensure that one of the District representatives attending the resolution meeting has authority to bind the District in any resolution agreement. The District will not bring district counsel to a resolution meeting unless the parent/guardian is bringing an attorney to the meeting.

Any resolution agreement reached will be documented in writing and is binding on the parties. The document will inform the parent/guardian of their right to void the agreement within three business days of signing the agreement.

Discipline

Students eligible for special education may be disciplined consistent with the disciplinary rules that apply to all students. The District will determine on a case-by-case basis whether discipline that is permitted under WAC 392-400 should occur. However, students eligible for special education must not be improperly excluded from school for disciplinary reasons that are related to their disability or related to the District's failure to implement a student's IEP. The District will take steps to ensure that each employee, contractor, and other agents of the District responsible for education or care of a student is knowledgeable of special education disciplinary rules.

A. Removal Up to Ten Days

Authorized school personnel may order the removal of a special education student from a current placement. The District need not provide services to a student who is removed from the current placement for ten school days or less in any school year if services are not provided to a student without disabilities.

B. Removal for More than Ten Days

Once a student has been removed from placement for a total of ten school days in the same school year, and if the District determines that the removal is not a change of placement, the District must, during subsequent days of removal, provide appropriate services to the extent necessary to enable the student to participate in the general curriculum, although in another setting, and to progress toward meeting the goals set out in the student's IEP. The building principal and/or the District's Executive Director/Director of Special Education in consultation with one or more of the student's teachers, will make the determination of such necessary services.

C. Change in Placement

A change of placement occurs when an eligible student is:

1. Removed from his or her current placement for more than ten consecutive school days in a school year; or
2. Subjected to a series of removals in a school year that constitute a pattern of removal because: 1) the series of removals total more than ten school days in a year; 2) the student behavior is substantially similar to the student's behavior in previous incidents that resulted in the series of removals; and 3) because of factors such as the length of each removal, the total amount of time a student is removed, and the proximity of the removals to one another.

Whether a pattern of removal constitutes a change in placement is determined on a case-by-case basis by the building principal and the District's Executive Director/Director of Special Education Director and is subject to review through due process and judicial proceedings. On the same day that a change of placement occurs for a student, either the building principal or the building school psychologist notifies the Executive Director of Special Education.

D. Manifestation Determination

Within ten school days after the date on which the District makes a decision to change the student's placement, the District will conduct a manifestation determination meeting to determine the relationship between the student's disability and the behavior subject to the disciplinary action.

The review of the relationship between a student's disability and the behavior subject to the disciplinary action will occur at a meeting that includes the parent/guardian and relevant members of the IEP team who are selected by the parent/guardian and the District. The building school psychologist is responsible for contacting the parent/guardians, sending out a meeting notice and determining the participating members of the IEP team. The team will review all relevant information in the student's file, including the IEP, teacher observations, and information provided by the parent/guardian to determine:

1. If the conduct was caused by or had a direct and substantial relationship to the child's disability; or
2. If the conduct in question was the direct result of the District's failure to implement the student's IEP.

If the team determines that the behavior resulted from any of the above, the behavior must be considered a manifestation of the student's disability.

The District will take immediate action to remedy the deficiencies, and will:

1. Conduct a functional behavioral assessment (unless already completed) and implement a behavioral intervention plan if one is not already in place; or
2. Review the existing behavioral intervention plan and modify it to address the behavior; and
3. Return the child to the placement from which he or she was removed from unless the parent/guardians and the district agree a change is necessary as part of the behavioral intervention plan, or unless the infraction involves drugs, weapons, or serious bodily injury.

E. Special Circumstances

School personnel may order a change in placement to an appropriate interim alternative educational setting for the same amount of time that a student without disabilities would be subject to discipline, but for not more than 45 school days, if a special education student:

1. Possesses a “dangerous weapon” or carries such a weapon to school or to a school function;
2. Knowingly possesses or uses “illegal drugs” while at school or a school function;
3. Sells or solicits the sale of a “controlled substance” while at school or a school function; or
4. Inflicts serious bodily injury upon another person while at school or a school function. Serious bodily injury means a substantial risk of death, extreme physical pain, protracted and obvious disfigurement, or protracted loss or impairment of the function of a bodily member, organ, or mental faculty.

Any interim alternative educational setting in which the student is placed is determined by the student’s IEP team and will:

1. Be selected so as to enable the student to participate in the general curriculum, although in another setting and to progress toward meeting the goals set out in the student’s IEP; and
2. Include services and modifications designed to address the behavior or to prevent the behavior from recurring.

The District may ask an administrative law judge or seek injunctive relief through a court having jurisdiction of the parties, to order a change in placement to an appropriate interim alternative educational setting for not more than 45 school days or seek injunctive relief through a court having jurisdiction of the parties when the District believes that maintaining the student’s current placement is substantially likely to result in injury to the student or others. If the student’s IEP team believes that the student may not be maintained in his or her current placement, the IEP team should work with the District’s Executive Director of Special Education.

Unless the parent/guardian and the District agree otherwise, if a parent/guardian requests a hearing to challenge either the manifestation determination or the interim alternative educational setting, the student must remain in the interim alternative educational setting pending the decision of the hearing officer or until the expiration of the 45-day period, whichever occurs first.

F. Basis of Knowledge

A student who has not been determined eligible for special education services may assert the protections if the District had knowledge that the student was eligible for special education before the behavior that precipitated disciplinary action occurred.

The District is deemed to have knowledge if:

1. The parent/guardian expressed concern in writing (or orally if the parent/guardian does not know how to write or has a disability that prevents a written statement) to district supervisory or administrative personnel or a teacher that the student is in need of special education and related services;
2. The parent/guardian requested that the student be evaluated for special education services; or
3. The teacher or other school personnel has expressed specific concern about a pattern of behavior demonstrated by the student to the director of the special education department or to other supervisory staff.

If instituting disciplinary action that would exceed ten days and the principal believes that one or more of these events applies to the student, the principal will notify the special education department to determine the appropriate disciplinary procedures.

The District is not deemed to have knowledge if, as a result of receiving the information described above, the district either:

1. Conducted a special education evaluation of the student and determined that the student was not eligible for services; or
2. The parent/guardian of the student has not allowed an evaluation of the child or has refused services.

If the District is not deemed to have knowledge that a student is a student eligible for special education services, the student may be disciplined as a student without disabilities who engages in comparable behaviors. The District will conduct an evaluation, which is requested during the time period such a student is subjected to disciplinary measures, in an expedited manner. Until the evaluation is completed, such a student will remain in the educational placement determined by the District, which depending upon the behavior can include suspension or expulsion.

Notwithstanding the foregoing, the District may report a crime committed by a student eligible for special education services to appropriate authorities. In the event of such a report, the District will ensure that copies of the student's special education and disciplinary records are transmitted for consideration by the appropriate authorities to whom the crime is reported, to the extent transmission of the records is permitted by the Family Educational Rights and Privacy Act (FERPA).

Staff Qualifications

All employees of the District funded in whole or part with state or federal excess special education funds will meet the standards established by the Professional Educator Standards Board (PESB) and defined in [WAC 392-172A-02090](#).

All employees will hold such credentials, certificates, or permits as are now or hereafter required by the PESB for the particular position of employment and will meet such supplemental standards established by the District.

Special education and related services must be provided by appropriately qualified staff. Other staff including general education teachers and paraeducators may assist in the provision of special education and related services, provided that the instruction is designed and supervised by special education certificated staff (or early childhood special education certificated staff, deaf education certificated staff, deaf education with American Sign Language proficiency certificated staff, teacher of the visually impaired certificated staff), or for related services by a certificated educational staff associate. Student progress must be monitored and evaluated by special education certificated staff or for related services, a certificated educational staff associate.

In the event a special education teacher does not have a certificate endorsed in special education (or early childhood special education endorsement, deaf education endorsement, deaf education with American Sign Language proficiency endorsement, teacher of the visually impaired endorsement), a district may apply for a pre-endorsement waiver through the special education section of the OSPI. To qualify for the special education pre-endorsement waiver, the teacher must meet PESB criteria outlined in WAC 181-82-110.

If the District must temporarily assign a classroom teacher without a special education endorsement (or early childhood special education endorsement, deaf education endorsement, deaf education with American Sign Language proficiency endorsement, teacher of the visually impaired endorsement) to a special education position, the District Executive Director of Human Resources will document in writing that:

1. The District is unable to recruit a teacher with the proper endorsement who was qualified for the position;
2. The need for a teacher with such an endorsement could not have been reasonably anticipated and the recruitment of such a classroom teacher at the time of assignment was not reasonably practical; and/or
3. The reassignment of another teacher within the district would be unreasonably disruptive to the current assignments of other classroom teachers or would have an adverse effect on the educational program of the students assigned to the other teacher.

If one or more of these criteria can be documented and the District determines that a teacher has the competencies to be an effective special education teacher and the teacher has completed two hundred forty clock hours (or the equivalent of 24 quarter or 16 semester credits) applicable to one or more Washington state special education teaching certificates (early childhood special education endorsement, deaf education endorsement, deaf education with American Sign Language proficiency endorsement, teacher of the visually impaired endorsement), the District can assign the teacher to special education in compliance with the process for making out-of-endorsement assignments and reporting them to the state.

Classified staff will present evidence of skills and knowledge necessary to meet the needs of

students with disabilities. The District will provide training to classified staff to meet the state recommended core competencies.

Personnel Development

In order to provide a staff development program to improve the quality of instructional programs, the following procedures will be employed:

1. Special education concerns will be identified through a staff needs assessment completed by administrators, teachers, educational staff associates, program assistants, parent/guardians, and volunteers;
2. All personnel who use restraint, restraint devices and/or isolation must be certified and annually trained in the use of such restraint, restraint devices, and/or isolation;
3. In-service training schedules will be developed based upon the results of the District assessment and in support of needs identified;
4. Training activities will be conducted for regular general and special education staff, staff of other agencies and organizations and private school staff providing services for students eligible for special education; and
5. Training for classified staff in the state recommended core competencies will occur through district provided training at least one time annually.

Public Participation

Any application and any required policies, procedures, evaluations, plans, and reports are readily available to parent/guardians and other members of the public through the District's special education office and the office of the superintendent. A notice regarding the availability of such documents will be placed on the District's website and in the District's calendar.

Updated: August 23, 2022
