

Revenues from Local, State and Federal Sources

Revenues from Local Resources

Use of Local Revenues for Enrichment

All local revenues will be used only for documented and demonstrated enrichment of the state's program of basic education.

Local revenues include the following:

- Enrichment levies collected under RCW 84.52.053;
- Local effort assistance funding received under chapter 28A.500 RCW; and
- Other local revenues such as, but not limited to, grants, donations, state and federal payments in lieu of taxes, or any local revenues that operate as an offset to the district's basic education allocation under RCW 28A.150.250.

Enrichment of the state's program of basic education includes supplementing the following:

- The minimum instructional offerings of RCW 28A.150.220 or 28A.150.260;
- The staffing ratios or program components of RCW 28A.150.260, including providing additional staff members for class size reduction beyond class sizes allocated in the prototypical school model and additional staff members beyond the staffing ratios allocated in the prototypical school formula;
- The program components of RCW 28A.150.200, 28A.150.220, or 28A.150.260; or
- The program of professional learning as defined by RCW 28A.415.430 beyond that allocated pursuant to RCW 28A.150.415.

The district can pay for the following with local revenues:

- Extracurricular activities;
- Extended school days;
- An extended school year;
- Additional course offerings beyond the minimum instructional program established in the state's statutory program of basic education;
- Activities associated with early learning programs;
- Any additional salary costs attributable to the provision or administration of permitted enrichment activities; and
- Additional activities or enhancements that the Office of the Superintendent of Public Instruction (OSPI) determines to be documented and demonstrated enrichment and for which the Superintendent approves proposed expenditures during the pre-ballot approval process required by RCW 84.52.053 and 28A.505.240.

Enrichment Levies

As necessary, the district will consider requesting voter approval of an enrichment levy. Such a levy will be for an amount permitted by law. The board will solicit advice from staff and community members prior to establishing the amount and purposes of the levy. The levy will be presented by program and expenditure in the district's annual descriptive guide for community

members as required by law. OSPI must approve the district's expenditure plan for the enrichment levy before the district can submit the levy to the voters.

Response to Audit Findings on the Use of Local Revenues

As part of the state auditor's regular financial audit, it will review the district's expenditures to ensure they are in compliance with RCW 28A.150.276, the statute that limits the district's use of local revenues to supplementing the state's basic education program.

Within thirty (30) days of receiving the auditor's findings, the board will hold a public hearing to review the findings.

Revenues from State Resources

The responsibility for financing public education in Washington falls primarily upon the state. To provide educational services beyond the levels possible under the basic education allocation, the district must depend upon state and federal special purpose funding programs and grants or enrichment levies approved by district voters.

The state provides special purpose appropriations for programs of transportation, for students with disabilities, and for such other programs as it deems appropriate to assist schools.

If the superintendent or designee identifies an optional state grant and determines that the benefits of accepting the grant outweigh the costs, he/she may provide a report to the board describing the benefits and the costs associated with accepting the grant. After reviewing the report, the board may formally authorize accepting the grant.

Revenues from the Federal Government

The objective of the board is to provide the best educational services possible within the resources available to the district. Federal grants and programs can provide helpful financial resources towards pursuing that objective. When it is optional for the district to participate in a federally funded program, the board will receive detailed analysis from the Superintendent or designee regarding both the advantages to be realized from the program and the additional costs in terms of staff member time, impact on existing programs, and new obligations that the program will require. Before authorizing participation in such a program, the board will first determine that the advantages outweigh the disadvantages and that the program will not detract from other programs already in operation.

The board agrees to comply with all applicable federal and state requirements that may be a condition to the receipt of federal funds including, but not limited to:

- Maintenance of fiscal records that show the receipt and disposition of federal funds;
- Provision for eligible private school students to participate in programs and/or services designed for the educationally disadvantaged as well as other programs that are supported by federal funds;
- Provision for testing to identify target students as well as to measure program results; and
- Provision for staff members and parent/guardian involvement, program planning, budget development, and program evaluation.

The district agrees to comply with Title I requirements pertaining to the implementation of internal controls for travel, contracted services, training, and capital outlay purchases and expenditures. The following controls are established for the Title I program:

- All Title I funded purchases and expenditures will be directly related to allowable Title I activities and services that are necessary to carry out the objectives of the current program effectively, and for the benefit of eligible students ;
- Title I purchases and expenditures will be restricted to those incurred by individuals with direct Title I duties and responsibilities and/or that benefit only eligible Title I students ;
- Title I funded in-service professional development will be directly related to specific Title I program activities and provided only to staff members with Title I program responsibilities and duties; and
- Appropriate documentation of all Title I purchases and expenditures incurred will be maintained for accountability and audit purposes.

The district further assures that a district-wide salary schedule is in effect and that the staff members are assigned equitably among schools. Instructional material will also be distributed equitably among all schools. The board grants authority to the Superintendent or designee to participate in the development of any state and/or federal regulations deemed to be necessary for the implementation of federally-funded programs.

Federal Impact Funds

Federal impact funds are provided to the district as a supplement to taxes and other revenue sources. State appropriated funds and local taxes contribute to the development and implementation of a basic education program for all students enrolled in the district. The district gives assurance that tribes and parents/guardians of Indian children will be afforded the opportunity to make recommendations regarding the needs of their students and will be involved in the planning and development of the basic education program, including those educational programs and services to be provided with federal impact funds. Indian students will have the equal opportunity to participate in the district's program with other students.

Recognizing that the board is the ultimate authority in defining the educational program of the district, the Superintendent or designee will establish procedures to assure the involvement of the tribes and parents/guardians of Indian students in the development of the basic education program, including the education services to be provided with federal impact funds and the participation of Indian children in the program on an equal basis. The Superintendent or designee will provide opportunities for parents/guardians and tribal council members to suggest if any policy and/or procedure changes as well as program changes are necessary to better serve the needs of all Indian students.
