

## **ENERGY MANAGEMENT/EDUCATION**

The board recognizes the responsibility to develop and maintain programs to support the conservation of energy and natural resources. In recognition of this leadership responsibility, the district shall strive to (a) institute effective energy management and (b) provide information and develop conservation attitudes and skills for the students it serves. To achieve the objectives of energy management, the superintendent or designee shall maintain programs for efficient energy management in the daily operation of the district's facilities, including:

- A. Assess past and present energy consumption practices;
- B. Review current operational and maintenance practices;
- C. Study operation changes designed to reduce consumption and related costs;
- D. Examine the feasibility of retrofitting alternatives for existing facilities as a result of engineering studies and reports;
- E. Provide periodic reports and/or recommendations to the superintendent and board;
- F. Monitor the energy management measures which are implemented; and
- G. Encourage, through a monitoring process, that instruction in energy use and conservation is incorporated into the district's program.
