

## **DLT Talking Points November 21, 2016**

1. The district music revision work was shared with the leadership team. Music staff will be working with each other and their building principals to determine future staffing and scheduling needs.
2. Sexual Health Parent Night was held on 12/1 at the Junior High. The evening was a collaborative event between QSD Health Teachers, the Quincy Valley Hospital, Cross Roads, and Community Health. Parents were given a variety of sexual health related sessions to attend.
3. Facility and Construction progress was sheared. Bids came in better than expected. Still need to wait for QJHS and QHS to determine alternates as process continues. By January a plan will be in place and shared with Junior High and District staff.
4. District Scorecard—in the process of launching to staff. The scorecard is a big picture data tool to be used to monitor student learning. The scorecard uses state and local assessment data to monitor student success. A more refined version will be forthcoming through DLT. Currently an internal document, hope for external and public use.
5. Building SIP work- all building goals are aligning with District Scorecard. Buildings Identified fewer goals to go deeper in the hope more will be accomplished.

Note: We could use your help recruiting parents who may be interested in serving on the DLT. Please send me names and contact information of parents whom you think would be willing and interested in participating.
