LCSD COVID-19 DASHBOARD

School Site	Attending In Person		Confirmed + Cases		Close Contacts In Quarantine		Cases originating on Campus		Cases originating outside of school	
	Students	Staff	Students	Staff	Students	Staff	Students	Staff	Students	Staff
MOE	466	67	-7-	-4-	-66-	-14-	-0-	-0-	-7-	-4-
PRE-SCHOOL	24	6	-2-	-0-	-0-	-0-	-0-	-0-	-2-	-0-
CHELAN MIDDLE	296	29	-1-	-1-	-12-	-3-	-0-	-0-	-1-	-1-
CHELAN HIGH	35	48	-5-	-1-	-7-	-2-	-0-	-0-	-5-	-1-
CSI	24	3	-0-	-0-	-0-	-0-	-0-	-0-	-0-	-0-
DISTRICT TOTALS	845	153	-15-	-6-	-95-	-19-	-0-	-0-	-15-	-6-

- No cases originating on campus since opening on October 19th
- Very few if any student cases reported during the return of MS and HS students over past 2 weeks

CONCLUSIONS

INCIDENCE RATE (I.R.)

- Local I.R. is an antiquated metric – no longer should be used as a measure for guidelines and regulations - Dr. Malcolm Butler

RATIONALE

- Based on research throughout the state - Outbreaks that have occurred in schools indicate: Communities with higher I.R's are not at more risk for outbreaks in schools than communities with lower incidence rates.
 - Communities with IR's of between 50 to 350 per 100,000 over 14 days had **82%** outbreaks at schools
 - Communities with IR's higher than 350/100,000 had **9%** of the outbreaks

OUTBREAKS

- **Outbreaks occur when people do not follow safety guidelines and recommendations, they should not be based on the I.R. of COVID-19 in the community.**
