Updated 10/25/2016

Item #	Date	Project	Comment	Action
1	8/16/2016	Conversion of HS	Science rooms to be reviewed to handle hot plates, plugged in at each station	We will be evaluating the existing conditions at the high school and make sure that we are in line with the JH curriculum
2	10/22/2016	High School	Will the art room still have the essential features of tall ceilings and large walls of windows letting in natural light? In the former placement of the art room there was no classroom above it. Is that still the case after moving the art room? I'll be asking for a skylight for natural light to fall on to the student work tables. This is essential for seeing and mixing color correctly, both happen daily on all art projects. The proper lighting is essential to a thriving art classroom.	accommodate, minimum 10'. In the original location the windows would have been to the north and west, in the new it is north and east which we understand to be more ideal. The move also allows for better material deliveries. Skylights are not likely, here or in the old spot as very often become maintenance troubles. Please know that we are not devaluing the art program in any way.
3	10/20/2016	High School	is there a document that shows the original ed specs to the final ed specs? Why hasn't this document been shared out?	The final ed specs are currently being finalized as we have just received all data forms. Expected to have complete this week and can make available upon request.
4	10/20/2016	High School	English classrooms all on the same area? We have 8 ELS teachers.	The administrative team at the HS will work with the Building Leadership Team to determine where classrooms are to be placed. That is a building decision.
	10/20/2016	High School	Special Ed Rooms. How many do we have?	Have four (4) smaller CR rooms for mainstream students and one (1) self-contained room for developmentally disabled
5	10/20/2016	High School	Why not use under the stadium for other areas?	Can be used, and will provide fencing and gate. The area though would need to be fire rated for permanent storage
6	10/20/2016	High School	FB outside equipment storage?	yes, this will be accommodated
7	10/20/2016	High School	Does there need to be a vestibule into band and choir?	yes, there will be
8	10/20/2016	High School	Call Keith and request a detailed description on design development	Description of design development stage provided and Heery is available at the school on 10/26 to answer any questions on the process.
9	10/20/2016	High School	Stadium built in such a way that there is storage/bathrooms/concessions underneath	See question 197. There will be a separate building to house the support spaces for the stadium in location that works well for use of the space
10	10/20/2016	High School	Track needs a tremendous amount of storage for equipment	Understood, we will develop during design development
11	10/20/2016	High School	Press box needs 2 separate coaches rooms on each end with a door that separates them from the announcer/scorer.. And a filming venue on top with power	understood, we will have 3-4 rooms
12	10/20/2016	High School	baseball/softball needs a central building with bathrooms, storage, concessions and announcing booth.	plan is to have building which will accommodate concessions, storage and restrooms. The announcing station and PA station is not currently within the budget and will be evaluated.
13	10/20/2016	High School	Lights for all varsity sports venues	The plan right now is to have lights at the stadium and we will have an alternate cost for baseball and tennis as this is not currently in the budget.
14	10/18/2016	High School	Ag - please create a loft storage area above the ag bio lab for storage	We believe we have found some space for this and will continue to develop with staff throughout design development
15	10/18/2016	High School	Swap the theatre/music delivery system for kitchen - 53' trailer	the building and we are working on how to make deliveries properly work to the kitchen.
16	10/18/2016	High School	Concessions for baseball	We have this planned in the center of the baseball complex along with storage and restrooms.
17	10/18/2016	High School	Drop off front door - back of school gym/bus traffic	best location, but there are potential opportunities at the west and north side of the school.
18	10/18/2016	High School	Soccer balls being kicked into parking lots	We will be evaluating the fields and potential for balls into the parking lot as we continue into design development on the fields.

Updated 10/25/2016

Item #	Date	Project	Comment	Action
19	10/18/2016	High School	Is turn around big enough for bus? Where do visitor buses park?	Turnaround will likely be changed to a hammer head and will accommodate buses as it must accommodate fire trucks. Visitor buses will likely park along the bus loop to the north of the student parking lot.
20	10/18/2016	High School	Like bathrooms and concessions all together for access from all sports.	We will look to do so as we develop the spaces at the stadium and by the baseball complex.
21	10/18/2016	High School	Explain parent pick-up/drop-off procedures. Need to have room for parents to park and pick-up without blocking road.	to the south of the school. This space will likely get extended to be larger then it is now.
22	10/18/2016	High School	Why is the project room cantilevered? Why not just make it bigger?	It is more expensive to finish out an entire space and the geometry of the spaces above is larger then the ones above.
23	10/18/2016	High School	Is there enough circulation space in downstairs and upstairs commons to alleviate noise outside office and upstairs classrooms?	Yes, we believe so based upon previous experience and planned circulation space. Regarding sound we will have sound proofing within the classroom walls and along the ceiling in the commons space.
24	10/18/2016	High School	Where are the wings to the stage and how do you access them?	This is currently under development
25	10/18/2016	High School	Thank you for the real toilers and concessions at the baseball/softball fields.	Your welcome
26	10/18/2016	High School	Place ELA SPED class with English department area	Will place within proximity
27	10/18/2016	High School	Place Math SPED class with math department area	Will place within proximity
28	10/18/2016	High School	Life skills not far from office, bigger space	The new room is slightly larger (1000 vs 900) plus additional support spaces. Classroom is in good proximity to office.
29	10/18/2016	High School	Try to have all classrooms as close to lower level as possible.	We are working to create department areas so the English department is near each other and so forth. In order to accommodate all rooms in the building and needs we need to place classrooms on the second floor or go to a one story building which is not feasible at this time.
30	10/18/2016	High School	Keep up the good work!	We appreciate it!
31	10/18/2016	High School	When the 2 jog "ins" on the bottom floor at CR7 and Art.	See question 180
32	10/18/2016	High School	Special Ed CR needs lots of space, they are expecting 20 kids per class.	Understand that currently is 13-14 kids. If the program grows we will make sure we have the ability to accommodate
33	10/18/2016	High School	SPED location - closer to office due to disabilities of students, medical, etc.	We believe we have good proximity and the new space is closer then currently have in the existing high school.
34	10/18/2016	High School	All the windows, concerns about heat. Example skywalk, library, office.	and out mechanical systems will be up to date and will keep the rooms at comfortable levels.
35	10/18/2016	High School	No staff restroom in east half of the building.	Will develop and make sure one is there
36	9/26/2016	High School	Important for all students to enter the building through the door that is closest to the student parking lot and that this main entrance has the school office right next to it. Also, if there is any chance that the new classrooms could be 900sf so that we don't lose any space when going from the old to the new school.	which will also serve for special events (sporting and performing arts) and this will be near the athletics entrance. This entrance will remain open until the start of school. The main entrance is on the other side of the school where administration is and where visitor parking is located. The new classrooms are scheduled to be 850sf which was determined based upon other area High School rooms. Rooms will be developed to provide the necessary space for educational needs.
37	9/22/2016	High School	Using the scaling provided on the plan it looks like the foot print for the actual service line is very close to the current HS service area for the main line, which is good. I do have a concern in that we currently run a mobile line in the cafeteria of the current HS for ala carte items and as an added service line to help with the speed of service for the meal period. Is there a location for this in the new commons?	Our area allowance does not take into account a satellite service area, which this may be referencing. We have not begun the detailed planning of how the service area will work at this time, that will continue to develop as we move into Design Development. For reference we have 1200sf devoted to the full prep kitchen and 200sf for the serving area.

Updated 10/25/2016

Item #	Date	Project	Comment	Action
38	9/22/2016	High School	Can data and power be added to the outdoor court area to allow us to move a service line outside during good weather?	It can, as we develop the outdoor area in design development we will work out with you a desired station so that we can get the infrastructure into a weatherproof box/location.
39	9/22/2016	High School	Commons area size. Based on the scale provided it looks like the new commons is approximately 100ft by 60ft (see below). That is the size of the auxiliary gym we currently use as a cafeteria. We fill that room at lunch. A room that is filled at your current enrollment. What happens when you grow? Will that be enough room when you are talking about a lunch period, students passing between periods and any other business going on in the commons. Considering that part of that space is stairwell egress will there actually be less seating space?	The commons space is programmatically 5500 sf with seating for approximately 550 students. Our understanding is that this will properly accommodate the current and expected student capacity based up two lunch periods. As we continue to develop the design and the specifically the commons space we will layout tables in the commons space to make sure we are accommodating the design set load in the space all while allowing movement around, use of the stairs and in/out of the kitchen/serving area.
40	9/15/2016	High School	Student Parking should be close to main entry	This is tricky as want the main entry to be a focus from the main entry and not a parking lot. The main parking needs to hold large volume for not only school but events as well which is why near the PAC, gyms and fields works well.
	9/15/2016	High School	Students/Teachers utilize halls as running track during cold season, therefore inside track would be a great addition	See question 40
41	9/15/2016	High School	Main & Event Entry should be the same as entry to high school is already an issue for students	Keeping them separate allows for better control of the building to keep separate the school and events area. In addition the admin area needs to be placed at the main entry for security and single point of entry. Will continue to look at the spacing between the main entry and the student parking lot.
42	9/15/2016	High School	PAC is using a lot of window space when they are typically trying to block light out	Will keep this in mind as we develop the interior and exterior of these spaces.
43	9/15/2016	High School	Preliminary Final Design looks good	Thank you!
44	9/15/2016	High School	Art room needs to be moved away from CTE so to allow for roll-up doors for both wood and metal shop	We have heard the other side of this as well that the art should be near the CTE. Regardless, as we place the individual spaces we will take into mind the need for the roll-up doors.
45	9/15/2016	High School	Concern about the use of CTE are to load out food services and deliveries to kitchen	The location of the kitchen was a recent revision and we will make sure that we minimize any impacts between food service deliveries and the CTE spaces.
46	9/15/2016	High School	Gym in Ellensburg is not a good setup. Do not like how noisy it is when you are in one gym and you can hear what is going on in the other gym.	Will keep this in mind as we look at the gym and the ed specs for the space.
47	9/15/2016	High School	How will delivery drives access the kitchen, both for the truck access and in and around the building?	The location of the kitchen was a recent revision and we will make sure that we pay attention to the path for deliveries. We fully expect the trucks to travel along the bus loop as it will also be a fire lane and able to accommodate the long trucks.
	9/15/2016	High School	Where are the dumpsters going?	Not yet determined, but likely in the back area. Will be determined as part of the site.
48	9/15/2016	High School	An indoor track at the high school would really give the PE classes and athletics a leg up.	See question 40
49	9/15/2016	JH Conversion	Be sure there is room for small (1-5) OT-PT/Speech/Sped testing for all schools	Will be following through on the ed-specs as setup by the staff and administration
50	8/16/2016	Conversion of HS	Science room air, and gas needs to be turned back on	We will be evaluating the existing conditions at the high school and make sure that we are in line with the JH curriculum
51	8/16/2016	Conversion of HS	Shop areas need to remain for use for the junior high	Space will remain as is, will work with the junior high in regards to their curriculum and how to maximize use of the space
52	8/16/2016	Conversion of HS	Keep wood and ag shop to continue current CTE classes to the 6-8th grade	See Response to item 3

Updated 10/25/2016

Item #	Date	Project	Comment	Action
53	8/16/2016	High School	Hope that the library can be easily accessible, with lots of study space, enough computers and has individual/hangout zones	We see the library at the heart of the learning area of the school and will look to accommodate all noted areas
54	8/16/2016	High School	Concern: please prioritize counseling & career center with enough space for education.	Area allocation has been established to provide necessary square footage to accommodate needs and functions
55	8/16/2016	High School	Space for after school study areas that are accessible with natural light and enough technologies	As the building is developed will look to areas in the building for after school use like the library and open spaces
56	8/16/2016	High School	Art room should be near the welding and metal shops	Will look into possibility of proximity for the spaces, we want to make sure the art room has as much natural light in as possible. We do recognize the multi-use and interaction of these spaces.
57	8/16/2016	High School	Access must be provided for truck delivery to the ag shop, access for animal trailers	Agreed, we will have an access road around the back to service CTE, Food services which will also function as our access for the Fire Department.
58	8/16/2016	High School	Separate rooms for choir and band at high school	We are investigating the possibility short and long term for separate choir and band spaces. Believe we will be able to create a devoted choir room within the building. Updated 10/25/16 We not include full band and choir rooms with support spaces.
59	8/16/2016	High School	Science rooms must be large enough to have good storage	Will make sure there is plenty of cabinetry and storage in the rooms. Through the design process we will meet with the staff to make sure their needs are accommodated within the budget.
60	8/16/2016	High School	Favorite plan is #2 (Farm 2) with courtyard and outdoor walking	Glad you like!
61	8/16/2016	High School	Want to be sure the new students have same or better access to the arts	We agree, and will be sure to draw attention to the program.
62	8/16/2016	High School	See that the courtyard is not neglected as it was previously in the high school	If courtyard is designed in the plans then will make sure it is not only accessible but a desired location for use.
63	8/16/2016	High School	How many students will this school accommodate?	Plan is to accommodate 1000 students
64	8/16/2016	High School	Science rooms need to match size of schools with our same size	Through the educational specification process we have developed a square footage for the science labs which is in line with other high school science rooms.
65	8/16/2016	High School	Need more science storage	see question 11
66	8/16/2016	High School	Need separate band and choir rooms	see question 10
67	8/16/2016	High School	How will the canal be separate from the high school?	This has not yet been evaluated, but we recognize that a safety separation between the site and canal will need to be part of the project.
68	8/16/2016	High School	what scheme allows for the greatest room size? Are all the schemes the same square footage?	All schemes are within the same square footage allowance established within the educational specification process.
69	8/16/2016	High School	Too much landscaping, creates hiding place for kids... or are we not using dense landscaping	on the site and have the same desire to create a safe environment without area for hiding.
70	8/16/2016	High School	Band room - more storage, larger and separate from choir room	see question 10, will meet with staff to make sure there is enough storage within the allotted budget
71	8/16/2016	High School	Priority to be maximizing classrooms space	We intend to maximize learning spaces and have established criteria through the educational specification process to do so.
72	8/16/2016	High School	Want to make sure implementing teacher suggestions versus adding bells and whistles to the building	During the design the Project Management firm and architecture team will sit down with staff to make sure their needs are accommodated within reason and budget for the project

School Construction Forum

Updated 10/25/2016

Item #	Date	Project	Comment	Action
73	8/16/2016	High School	Consider a practical and economical stadium	Will continue to be budget conscious while following our guiding principles of maximizing public usability and serving as a point of pride for the community.
74	8/16/2016	High School	Need to have a separate band and choir rooms	see question 10
75	8/16/2016	High School	Ask teachers what needs to be updated/fixed to convert QHS to Junior High	Will be creating a priority list of items at the existing high school that need to be completed prior to the junior high using the building.
76	8/16/2016	High School	Provide separate band and choir rooms	see question 10
77	8/16/2016	High School	Designing based on current programs would be lacking vision, allow room to build the program	Agreed, we will design for not only current programs but to provide maximum flexibility as we look at items in place and infrastructure.
78	8/16/2016	High School	Note that water leaks out of the canal to the north therefore will need to look at drainage along the canal	Will evaluate as we design the building and surrounding landscaping
79	8/16/2016	High School	No desert landscaping	Will continue to develop the landscaping that fits the surrounding areas and is in line with maintainability, and budget.
80	8/16/2016	High School	Could add willow trees along the ditch to absorb the leaking out of the ditch which would also act as a wind break and hide the canal. (Bart Yates notes ability to provide all the trees needed for free)	Thank you for the suggestion and offer, will evaluate with landscape architect.
81	8/16/2016	High School	Be sure to provide accessibility to the "shops" for semi truck deliveries	See question 9
82	8/16/2016	High School	Location of the ag department in relation to learning labs such as greenhouse and barn	Will continue to look at the proximity of programs internally and externally to make sure that access is easily achieved.
83	8/16/2016	High School	Farm #2 - Love the grand entrance and library scheme, overall favorite scheme as a showpiece for community	Thank you, we like it too!
	8/16/2016	High School	Concern with farm 2 - ensuring a very usable outdoor space as concern when at the high school that there was no place to get outside.	We have heard the concern and if a courtyard is designed will make sure it is easily accessible and promoted
84	8/16/2016	High School	Farm 2 courtyard seems too open to the wind for students to enjoy	Will continue to look at wind patterns and the design of the building.
85	8/16/2016	High School	Irrigation theme: metal sculpture with tractor parts, etc....	Will take into consideration as we design the exterior and landscaping
86	8/16/2016	High School	Fitness classroom by gym	Agreed, we will make sure proximity of the fitness area is nearby the other athletic areas like the gymnasium
87	8/16/2016	High School	Walking track on the upper gym level	We can evaluate in line with the budget
88	8/16/2016			
	8/16/2016	High School-farm#1	A little disjointed	If option further developed, will look to align spaces together.
89	8/16/2016	High School-farm#1	Maximize Classroom Space	Classroom space is equal in all options based upon area allowance determined in the educational specification process
90	8/16/2016	High School-farm#1	I prefer the more compact floor plans and reducing optional features, like skywalk, to increase classroom space.	able to maximize use of the building footprint
91	8/16/2016	High School-farm#1	another if they are on opposite side. Students only have 5 minutes to get to class.	Understood, will look to make the building and circulation space as efficient as possible
92	8/16/2016	High School-farm#1	This seems too spread out and take kids a long time to get from a class at the end to the other.	See response to #44
93	8/16/2016	High School-farm#1	livestock on east side, carry odor away	If option further developed, will look at wind direction and how to properly situate
94	8/16/2016	High School-farm#1	Wind exposure. Snow drifts. Don't like dead ends	We will continue to look at the building and the impacts of the wind and associated snow drifts.
94	8/16/2016	High School-farm#2	Quincy needs more green and to use the water resources that have no desert landscape. Farming brought green to the area. Celebrate that. Not desert.	and will keep this in mind as we develop the site.
96	8/16/2016	High School-farm#2	The best parts of small town are the chances to be invited. To do sports, to do music, theater, choir, art. We need resources (rooms + storage+ facilities) to do this.	the great city that it is. We will do everything to promote each of these departments and provide them the resources necessary.
97	8/16/2016	High School-farm#2	Space concerns for choir/band. For all plans	See question 10

School Construction Forum

Updated 10/25/2016

Item #	Date	Project	Comment	Action
98	8/16/2016	High School-farm#2	Concerned about north wind onto courtyard - possibility of more outdoor open space on south end of building?	We are continuing to understand the wind directions and concerns and will continue to make sure the building is properly situated to minimize wind impacts
99	8/16/2016	High School-farm#2	We want more trees in Quincy = Oasis. No desert	see question 48
100	8/16/2016	High School-farm#2	Love the concept behind the library	Thank you, we like it as well.
101	8/16/2016	High School-farm#2	Need choir room plus band room. Large storage for instruments	see question 10, as for instrument storage we will have space in the band area for secure storage
102	8/16/2016	High School-farm#2	Block north wind with courtyard? Greenhouse space?	See question 48, as for the greenhouse we will determine as part of the site design
103	8/16/2016	High School-farm#2	This is a huge investment in future. We want lush, modern, technology to draw families, businesses and resources here rather than other towns around. We need reasons to live here + not just work here for families. These schools are a major draw for our future.	We agree 100% and this is in line with our guiding principles.
104	8/16/2016	High School-farm#2	Classroom for fitness by gym (my favorite)	We like this as well and believe in the proximity
105	8/16/2016	High School-farm#2	Favorite design	We like this one as well
106	8/16/2016	High School-farm#2	I like this with less trees	landscaping and will make sure the landscaping does not deter from the building as is easy to maintain
107	8/16/2016	High School-farm#2	Would love to see the student commons area for food service have a more retail look, such as stations for meal sales. IE sandwich station, Latino, station, Italian etc..	We will have to evaluate the possibility not only with nutritional services but if we can accommodate within the square footage. We have looked to implement DECA in the main commons area
108	8/16/2016	High School-farm#2	No courtyard	We are continuing to evaluate the designs
109	8/16/2016	High School-farm#2	This is my favorite! The courtyard is great just don't want it to be "off limits" like it was in the old high school. So glad NAC is on the job!-Kelly Escue	Glad you like it, if a courtyard is in the final design we will make it a point to make it accessible and usable.
110	8/16/2016	High School-farm#2	Honey locust trees have thorns?	yes
111	8/16/2016	High School-farm#2	The current courtyard is a waste but a central, well used courtyard would be a great asset.	We are continuing to evaluate the design including the courtyard, and will be sure if it is in the final design we will make it accessible and usable
	8/16/2016	High School-farm#2	Plan #4 with courtyard + grand entrance with library view is great!	Glad you like.
112	8/16/2016	High School-farm#2	Basement mechanical? Easy digging, no rocks	Thank you for the suggestion, we will evaluate this as a part of the design.
113	8/16/2016	High School-farm#2	Like the fitness areas over looking fields. Water bottle fountain station please!	Water bottle filling stations integrated with the water fountains are a great for the environment and something that we will be looking into.
114	8/16/2016	High School-farm#2	Try indoor track on top level?	See question 40
115	8/16/2016	High School-farm#2	Student stores - proximity to commons plus classroom	We are looking to include the student store into an area with good proximity to the commons.
116	8/16/2016	High School-farm#2	Green house - not enough light if in courtyard. Co-locate with barn? At NE	As we evaluate the site we will determine a proper location for the greenhouse.
117	8/16/2016	High School-farm#2	We are agriculture...so emphasize at theme & productivity (water/crops/industry)...not desert...what Quincy has evolved to...not what it has been	Will take this into account as we move forward with the landscape design
118	8/16/2016	High School-farm#2	Turn classroom on top to enclose courtyard with art by cite	Will evaluate this as part of the next design iteration
119	8/16/2016	High School-farm#2	bridge to upper level above gyms with 2-3 lane walking trace entering with room and fitness center	See question 40
120	8/16/2016	High School-farm#2	Minimum 12 feet height doors for PAC, no center posts.	entry. We will integrate a large opening for props to be built off stage and transported in.
121	8/16/2016	High School-farm#2	Open commons to south? Open courtyard to south?	We will investigate the layout of the building with an open courtyard to the south
122	8/16/2016	High School-farm#2	Like open/ welcome feel of main entry	Thank you, we want the main entry to be welcoming and a focal point.
123	8/16/2016	High School-farm#2	Need marketing + learning labs close to commons + courtyard (like #2)	As our design develops we will look to bring the student store near the commons space

Updated 10/25/2016

Item #	Date	Project	Comment	Action
124	8/16/2016	High School-farm#2	Tree's maintenance, too many?	This is a concern of the QSD as well, we will be sure to provide adequate landscaping while balancing maintainability
125	8/16/2016	High School-farm #2	like monument hill: cactus/ sage...landscape...like Vantage!. Moses Lake?	Will continue developing the site and landscaping based on the local area and feedback from these committees which has included comments related to lush as well as desert
	8/16/2016	High School-farm #2	Make sure trees don't block views	Agreed, we want the building to stand for itself and the landscaping to highlight
126	8/16/2016	High School-farm #2	Turn top 2 classroom Buildings	Will investigate how that will work with the current design.
127	8/16/2016	High School-farm #2	Performing arts entry? Move open/welcoming? With courtyard	As design develops we will look to improve the sports/performing arts entry to make it more welcoming.
128	8/16/2016	High School-farm #2	Courtyard interior not lawn...crushed granite, basalt, dry bud appearance.	landscape and keep in mind as we develop the courtyard (if one remains in the final design)
129	8/16/2016			
130	8/16/2016	High School-X-scheme	Rotate building	Assuming this is due to area winds, if this scheme is developed we will look to properly account for wind directions
131	8/16/2016	High School-X-scheme	Like orientation to neighborhood	and is friendly to the neighboring community.
132	8/16/2016	High School-X-scheme	Please!!!! Parking orientation/ live stock away from houses/ view for neighbors/no courtyard/ still have natural light	As we develop the site we will look to keep any livestock away from the homes and try to control the smalls based on prevailing winds. We want the view of the school to be positive for the neighboring community and will do everything we can to accommodate. Courtyard is under review based on multiple comments and natural light is key for our building into all spaces.
133	8/16/2016	High School-X-scheme	don't like fields further from gym	We will look to create proximity from the gym/fitness area to the fields.
134	8/16/2016	High School-X-scheme	Don't like Dead ends	We are always looking to create efficiencies within our circulation space and will continue to do so.
	8/16/2016			
135	8/16/2016	High School-Courtyard	Like courtyard for entry to gym & P.A.	Are continuing to evaluate the courtyard and its role within the building and proximity to all parts of the building
136	8/16/2016	High School-Courtyard	Worry about trees next to building	We understand the concern and are evaluating within our landscape design.
137	8/16/2016	High School-Courtyard	Like strong visual presence	We agree, we want the building to be a showcase for the community while still being budget conscious
138	8/16/2016	High School-Courtyard	Like CTE placement open to courtyard and coral/field	We agree and will continue in our development to have the CTE in good proximity to the outdoors
139	8/16/2016	High School-Courtyard	We need 2 music rooms in our new H.S. One for band, one for choir...building for future needs	See question 10
140	8/16/2016	High School-Courtyard	No courtyard	We are continuing to develop the drawings and take all input into account, the courtyard has been met thus far with mixed reviews.
141	8/16/2016	High School-Courtyard	Courtyard needs seating & low maintenance plants or skip it.	Agreed, if we proceed with the courtyard we want it to be easily maintained.
142	8/16/2016	High School-Courtyard	Would like to see: traffic flow/ ample parking/ 2 music rooms for band and choir/ an area designated to drama for storage 7 to prep for the show/ consideration of our weather when planning the roof. Ex. Monuments drains water in the front entry making it an ice hazard in winter time. Not crazy about the idea of a courtyard	We will provide ample parking per the city codes and beyond, the traffic flow will be reviewed as part of the SEPA process and with the community. We will take into account the local weather patterns as we design the exterior and site of the building.

Item #	Date	Project	Comment	Action
143	8/16/2016	High School-Courtyard	Would love to see a pool-maybe in partnership with city	A pool is not part of the scope of the project at this time. We do though recognize a need for this in the community and are open to having conversations on how this can happen down the line.
144	8/16/2016	High School-Courtyard	Very similar to the original High School Design	We have heard this, although it was not something really known or understood while this option was created.
	8/16/2016	High School-Courtyard	Still would be nice to see a swimming pool added here	See question 97
145	8/16/2016	High School-Courtyard	Not sure about a courtyard, we had one at the old H.S. and it was never used.	see question 94
146	8/16/2016	High School-Courtyard	Most of the school year is during the winter too.	see question 10
			Please include two music rooms, One for Choir, one for Band. Great idea!	
147	8/16/2016	High School-Courtyard	Stinky winds in the kitchens??? Hot water tanks need. Water softeners. A little investment now will save money in repairs.	Will develop the kitchen space as the design develops where we will meet with the proper staff to determine needs to make the space function properly
148	8/16/2016	High School-Courtyard	kitchens will need to have enough drive space for delivery trucks 53 ft. to back up & unload	Will be sure to provide ample access for deliveries to the kitchen for large trucks just as we will need to for buses and fire trucks
149	8/16/2016	High School-Courtyard	kitchens will need a central receiving area for USDA products on average 8 pallets of frozen, 5 of dry. Current space at high school is too small and blocks access to outside door.	see question 102
150	8/16/2016	High School-Courtyard	High school: We had a courtyard at the current high school and eliminated it.	see question 94
151	8/16/2016	High School-Courtyard	Do away with courtyard. Replace with indoor study area	see question 94
152	8/16/2016	High School-Courtyard	Eliminate the courtyard. There is one at the current high school and it hasn't been used since I moved here in 1979	see question 94
153	8/16/2016	High School-Courtyard	Traffic study dependent upon harvest. Sound barriers for neighborhoods	A traffic study is an integral piece of the SEPA study which is a requirement of the city. We will also look at the sounds and doing what we can to minimize the acoustical impact on the community.
	8/16/2016	High School-Courtyard	Green house and other Ag building are a must	Will be reviewed and placed as part of the site development
154	8/16/2016	High School-Courtyard	Large Than "Adequate "PAC is needed for performances. Absolutely!	Our building specification calls for a 500 seat auditorium which we believe is a great size for now and growth of the community.
155	8/16/2016	High School-Courtyard	Livestock on east side carry odor away from neighbors	Great suggestion, we will review and do everything we can to minimize odors to the neighboring community.
	8/16/2016	JH Conversion	Make sure there is enough eating space	During the Design Development stage we will test various seating arrangements to make sure we are able to efficiently maximize the space.
156	8/16/2016	JH Conversion	Provide Enough Specialist Rooms	Has been revised to accommodate. The 3-5 Sp. Ed. Room is also a resource room.
157	8/16/2016	JH Conversion	Provide Enough toys	During the Design Development stage we will develop the outdoor play area.
158	8/16/2016	JH Conversion	Add natural light to the music rooms	This is a difficult thing to accomplish due to location in the building, and would require a complete re-organization. In addition, students are not in the room all day and will be accessible to natural light for all other hours of the day.
159	8/16/2016	JH Conversion	Add windows to the music room	See response to 115
160	8/16/2016	JH Conversion	find way to give the music room natural light or an outside wall	See response to 115
161	8/16/2016	JH Conversion	Love the pre-k/kinder play space, outdoor space outside of the enrichment room and the new entrance concept	Great! Thanks!
162	8/16/2016	JH Conversion	large "wash-up" area in enrichment room-long bench sink with multiple faucets for very messy kids (paint clay science)	Will be developed as part of the design development phase of the design.
163	8/16/2016	JH Conversion	Kitchen needs to be its own production kitchen. Like Pioneer! Do it right the first time, not later	with the other elementary schools. The new high school and existing high school (future JH) will be production kitchens for the District.

Item #	Date	Project	Comment	Action
164	8/16/2016	JH Conversion	Don't host our "special" place, like the music room	Unsure of comment, but believe desire is to retain the 2-story existing feel which cannot remain in order to accommodate necessary teaching spaces.
165	8/16/2016	JH Conversion	Check with music specialist on room size to accommodate class size & instrument storage	1,100sf of allocation is typically adequate for an elementary music classroom. There is no space currently programmed for instrument storage.
166	8/16/2016	JH Conversion	I would like retain this Gym as proper facilities to hold tournaments or Jr high Sporting events. Two separate locker rooms or changing rooms would be nice!	The gymnasium will remain as is for hosting tournaments and JH sporting events if needed. The locker rooms will no longer be available though in order to make room for learning spaces. School use will be looked at to determine ways to provide changing areas if needed beyond the restrooms for sporting events.
167	8/16/2016	JH Conversion	New Elem: missing 2 support classrooms for Title & ELL or 1 if reading spec. would be one of those room	See Response to 113
168	8/16/2016	JH Conversion	Any way to get windows into the music room?	See Response to 115
169	8/16/2016	Mt View	After hours entry is awesome, appears to flow very well	Thanks, we like it as well!
170	8/16/2016	Mt View	Concern that gym takes away play space, is there a potential for more toys?	Grant was received for additional play toy that will be added in around this project. In addition will provide additional hardscape to replace the current area where the gym is going.
	8/16/2016	Mt View	a single toilet will not handle a load of parents/kids coming to play basketball.	We are evaluating how to fit another restroom within the current footprint.
171	8/16/2016	Mt View	Is there enough current parking?	We believe there is, the additional load from the gym will be after hours when staff is not at the building. Therefore the current parking counts appear to be sufficient.
172	8/16/2016	Mt View	More bathrooms in gym area - at recess if bathroom is needed there aren't any close by	See Response to 128
173	8/16/2016	Mt View	Bathrooms - during after hours events would only have 1 toilet? Or they have to go all through the school?	Currently after hours would only have access to the single toilet, see response to 128.
174	8/16/2016	Mt View	Consider needs in gym for seating for programs. (For all elementary)	In addition to the approximately 68 seats in the bleachers we will can have chairs brought in as needed to the space. The occupancy load for the gym is over 300.
175	8/16/2016	Mt View	Need a big hard scape area with tetherball, hopscotch, 4 square lines	See response to 127
176	8/16/2016	Mt View	How do kids access the playground?	From the new gym there is a door north to the fields or east through the new entry out to the parking area and up to the playground. Access from other areas of the building will remain as is.
177	8/16/2016	Pioneer	Even though it spreads out the school more, like that the community was considered. Love the entry and additional parking.	Very happy to hear!
178	8/16/2016	Pioneer	Parking availability & sidewalks? Are these budgeted for?	As you see in the plan we are adding the additional stalls to the north as we recognize current parking concerns. This scope will be accommodated either via the current Pioneer project budget or money put aside for infrastructure.
179	8/16/2016	Pioneer	Men's/women's bathroom? The gyms that they model after have men's/women's restrooms.	Sage Point in Moses Lake, our model, only has a single unisex restroom.
180	8/16/2016	Pioneer	What is the distance from the 3 point line to the sideline?	19'-7"
181	8/16/2016	Pioneer	Like the gym, added parking and entrance on the east side. Also, Having the hallway turn the corner will make the portables feel more part of the school.	Glad you like supervision at the restrooms during use of the gym (PE class, and after hour usage) versus use of the restrooms by the existing portions of the school. Will continue to evaluate in line with the design of the new building.
182	8/16/2016	Pioneer	Be nice to have the gym bathroom in the hall be use by others (students from portables, enrichment...)	This beyond the scope of the project which is to add a new gymnasium to the school.
183	8/16/2016	Pioneer	Enclose area & back door of kitchen to include door to freezer-This will add storage & safe access to the freezer

Updated 10/25/2016

Item #	Date	Project	Comment	Action
184	8/16/2016	Pioneer	Pioneer currently has little to feed storage for dry goods	This beyond the scope of the project which is to add a new gymnasium to the school.
185	8/16/2016	Pioneer	Would it be possible to put bathroom in hall, outside of gym, and do more than one? Students coming in from portables have long way to travel to current bathrooms.	See question 140, in addition we are evaluating the ability to include a 2nd restroom.
186	8/16/2016	Pioneer	Can we add another restroom to elementary gyms, so that community events are more practical and welcoming?	The design team is evaluating the ability to add an additional restroom while staying within budget.
187	8/16/2016	George	Looks amazing, love the community/after hours entry	Thank you, we are excited about the new look for the school!
188	8/16/2016	George	Like the corner instead of expanding straight out as makes more comfortable without the long hallway	Our design team did a great job in bringing this design forward
189	8/16/2016	George	How many grades does this include?	K-5 As part of our long-term goal to provide the best educational experience for students and parents, we are moving to the K-5 neighborhood school model. When complete, this project will result in five K-5 schools in the district, including George, Mountain View, Pioneer, Monument and a new elementary located at the current junior high site. Siblings will be able to attend the same schools together, resulting in a family-friendly atmosphere where older students take care of and act as role models for younger students. Under this new model, students will remain in their neighborhood elementary school from Kindergarten through fifth grade (six years). They will transition directly into the new middle school model as sixth graders, eliminating the transition to Monument Elementary. Research shows that fewer transition result in better outcomes for students. A community-based committee will spend a full year researching best practices in education, and will address the question of how to best transition students from our elementary schools to the middle school. Currently our schools provide a number of activities to help make our transitions work
190	8/16/2016	George	How will the integration into "Quincy" schools be made easier for students?	We are looking into ways to improve the kitchen at George and will take this into consideration as part of our evaluation
191	8/16/2016	George	Walk in combo-refrigerator/freezer with a future population of 300 students an upright. Freezer will not be big enough to store her Frozen goods.	
192	8/16/2016	George	Remove & Repurpose old upright. Reach in freezer and refer, then turn that space into a work station & dry storage area.	See question 149
193	8/16/2016	George	How will a 70 person bleacher plan accommodate large family assemblies?	For larger events we will have chairs that can be brought in to accommodate. The building is sized to accommodate up to 329 people at this time.
194	8/16/2016	George	How Many students will this space accommodate?	Currently bleacher seating for 65 and general capacity of 329
195	8/16/2016	George	Looks good!	Thanks!
196	8/16/2016	Gymnasiums	Have two bathrooms in gym, especially for community events	see question 144
197	8/16/2016	Gymnasiums	More bathrooms needed	see question 144
