Ms. Mancini and Ms. Benedict

Math

Ms.
Mancini

We are starting the last module of the year!!! We will learn the basics of graphing and coordinates.

We are busy prepping for the SBAC tests which are coming up in 2 weeks. Our testing dates are May 15th and 23rd for the AM (BLUE) class and May 17th and 19th for the PM (GREEN) class.

Science

I hope your child has told you about the Science EXPO that will be held on May 25th in the morning. Each student should conduct their own science project and document all steps in the scientific process. We are doing the majority of the rough draft process in class. The students need to have a Tri-board presentation with all information at school on May 24th. The students have all the information if you have any questions. You can also email me if you need more information.

Upcoming Dates:

May- 25th Science Expo and Solar Car field trip

May 26th- Half day

May 29th- No school, Memorial Day

Ms. Benedict

History and Writing: Our civics unit focuses on both our rights and our responsibilities as members of this community. The students came up with many ideas that show they are willing to help other people. For example, pick up litter around the school, give used clothing to Habitat for Humanity or to pick up rocks in the grass for all the student's safety. They will be writing an essay that gives their own opinion on a real court case along with reasons and examples.

Reading: It's so important that the students get exercise and get to bed early each school day, but especially important during our state testing. This is their time to do their best and to show what they have learned.
